DESCRIPTIVE CATALOGUE

Fruit and Ornamental Trees

SHRUBS, ROSES, EVERGREENS,

HARDY FLOWERING PLANTS, ETC.

CULTIVATED AND FOR SALE AT THE

FRUITLAND NURSERIES

AUGUSTA, GA.

P. J. BERCKMANS, PROPRIETOR.

AUGUSTA, GA.

Jas. L. Gow, Printer & Stationer.

PREPARATION OF THE SOIL.

The most desirable soil for fruit trees is a rich loam, naturally dry, or made so by drainage. Sow cow peas in Spring and turn under with a two-horse plow, followed by a sub-soil plow, during August or September. Lay off the rows at required distances and dig holes at least two feet wide and two feet deep; fill the holes by breaking in the sides, commencing at the bottom and going upwards. Use surface soil in filling up, and with this mix a shovelful or two of cotton seed and stable manure compost well decomposed. Avoid the contact of the roots with heating manures.

SELECTION OF TREES.

For this climate, experience has taught us that one year old trees, of thrifty growth, are the most desirable. Purchasers should bear in mind that such a tree can be removed from the Nursery with all its roots; whereas a two or three year old tree cannot be taken up without cutting away a large portion of them. Success in transplanting is increased according as attention is paid in selecting well rooted trees, instead of heavily branched ones. Give as many sound roots to a tree, and as little head, as possible. We prefer to cut away every branch, leaving the body two feet high, and to allow the tree to form its head in its permanent place, rather than in the Nursery row.

To insure the earliest crop of fruit after transplanting, always select one or two years old trees.

PREPARATION OF THE TREE.

Before planting remove all broken roots. One year old Peach or Apple trees, cut back to a naked stem two to three feet high, leave no side branches. Two years old trees should have their branches cut back to half their length or more, the lower less than those above, cutting in shorter as you go upward, and leave the leader the longest. Plant as deep as the tree was standing in the Nursery row, except Dwarf Pears and Cherries, which should be planted sufficiently deep to cover the stock from two to three inches.

TIME OF PLANTING.

In this climate, vegetation, although inactive in Winter for the formation of leaves and new wood, is never so as to new roots. A tree transplanted in November or December will, by the ensuing Spring, have formed new roots sufficient to give it a firm hold in the ground, and will grow off rapidly when active vegetation commences. Plant as early after the first killing frost as practicable, and do not delay it until the Spring months. Apple Trees can be transplanted as late here as March, and in some seasons until the first of April, but success is increased if the planting has been done in the Fall or Early Winter.

PREFACE.

UMEROUS and valuable additions have been made to the collections of Fruits and Plants since the last edition of our Descriptive Catalogue of Fruits was issued.

Upwards of two hundred acres are now used for Nursery purposes; the stock of Trees and Plants, in point of quality and variety, is equal to that of any similar establishment in the United States; but, although we do not presume to offer better products than can be grown elsewhere, we, however, claim for our trees perfect adaptability to the Southern climate and wants of Southern Fruit growers, together with healthy growth, large size and low prices. We refer with pleasure to a business career of upwards of twenty-seven years in conducting the "Fruitland Nurseries," during which the rapidly increasing sales of the establishment are evidences that the quality of the products has been of uniform quality and highest standard of classification.

PLEASE READ THIS BEFORE ORDERING.

TO CORRESPONDENTS.

We respectfully beg our patrons to notice the following

TERMS, CONDITIONS, ETC.

LETTERS RECEIVED.

All Letters replied to the same day as received. To facilitate carrying out this rule, we would respectfully ask that the name and address of the correspondents be written in full and legibly, giving name of Post Office, County and State.

EXECUTION OF ORDERS.

All Orders are executed as promptly as possible after the opening of the forwarding season. In the height of the season it is a matter of extreme exertion to fill orders within forty-eight hours after reception, and we would suggest to our customers the following hints, which we hope will prove satisfactory, as they will assist us very much in the dispatch of business:

1st. Write your "order" plainly and legibly upon a separate list, and not mixed up in

the body of your letter.

2d. In ordering, state whether standard or dwarf trees are desired, and if the age or style, or varieties named, cannot be furnished, state whether, and to what extent, other varieties, sizes, etc., may be substituted. We never substitute unless authorized to do so.

In case our supply of any particular variety is exhausted—which will happen in the most extensive establishments—we make it a rule to return the money, unless authorized

to fill out the order with other varieties.

3d. Orders are often sent in too late to enable us to fill them, or to notify parties in time to allow them to get supplied elsewhere. We, therefore, solicit early orders, which are filed as received, and filled in rotation. Usually we commence taking up trees by the 5th of November, and the forwarding season lasts until the middle of March. Plants grown in pots can be forwarded at any time of the year; Strawberry Plants from October to March.

4th. Give plain and particular directions for marking and shipping packages. When no directions are given, we shall use our best judgment in forwarding, but in all cases the articles are at the risk of the purchaser after proper shipment, and if delay or loss occurs, the forwarders alone must be held responsible. Carrier's receipts will be taken and sent to our

customers in all possible cases.

PREPAYMENT OF FREIGHT.

This being required by the Railroads here, remittances sufficient to cover freight charges must be made in every instance before orders are forwarded. (For rates of freight, see outside cover page.)

ATTENTION TO CUSTOMERS.

It is our earnest desire that all the requirements and directions of our customers be scrupulously attended to by our assistants, and we practice the utmost personal supervision to see that it is carried out. We would therefore respectfully request that we be informed if at any time there is cause of dissatisfaction, that we may have it rectified at the earliest possible moment.

PACKING.

Trees and Plants are packed with the utmost care, so as to insure their safe carriage to great distances.

Orders to amount of \$5 are packed free of charge. Cost of boxes will be charged on orders below that amount. The charge is from 25 to 50 cents, according to size of box.

TERMS.

Cash with the Order, or C. O. D. (collect on delivery) by Express, collecting charges to be paid by the consignee. No deviation.

Large orders can be forwarded by the ordinary freight lines, and will be consigned to ourselves. The Bill of Lading endorsed to parties ordering will be sent C. O. D. by

Express, thus reducing heavy Express charges and facilitating collections.

We are compelled to adhere strictly to this rule, owing to the difficulty in collecting amounts in remote localities, and the utter impossibility to conduct business upon a credit system.

REMITTANCES.

Preferred in drafts on New York or Augusta, payable to our order, or wherever convenient, by Post Office Order. Money sent through the mail is in all cases at sender's risk. When Post Office Orders cannot be procured send the money in a Registered Letter.

TREES IN LARGE OUANTITIES.

Estimates for such, and special varieties, will be given on application.

Orders for 100 or 1,000 trees in the aggregate, but comprising several classes, will be billed as follows:

50 trees of a class at 100 rates; less than 50 at dozen rates. 500 at 1,000 rates; less than 500 at 100 rates.

NO TREES OR PLANTS SENT BY MAIL.

The labor and time required to properly prepare trees for mailing during our busy season, together with frequent insufficient remittances for postage, are inadequate to the returns, and compel us to respectfully decline this class of orders.

RESERVING TREES.

Orders for trees to be reserved for weeks or months after the opening of the shipping season, must in every instance be paid for in full at time of ordering. We trust that the necessity of this rule will be obvious to all our friends.

TO PERSONS SEEKING INFORMATION UPON HORTICULTURAL SUBJECTS.

While we are always ready to answer every letter desiring information upon these topics, and will cheerfully reply briefly to all queries, we respectfully suggest to our correspondents to subscribe to either of the following practical periodicals, as it often requires more time to answer a query than we can afford to devote to it; and these publications will give full information upon every subject connected with horticulture:

The Gardners' Monthly, \$2 per annum; Chas. H. Marot, publisher, 814 Chestnut street, Philadelphia.

The Rural New Yorker, \$2 per annum, weekly; 34 Park Row, N. Y.

The American Agriculturist, \$1.50 per annum, monthly; 751 Broadway, N. Y.

The American Garden, \$1 per annum, monthly; B. K. Bliss & Sons, 34 Barclay street, N. Y.

The Southern Cultivator, \$1.50 per annum, monthly; Atlanta, Ga. The Southern World, \$1 per annum, semi-monthly; Atlanta, Ga.

Special attention of fruit growers and amateurs is called to the Catalogue of the Georgia State Horticultural, Society. This Catalogue gives lists of the most valuable varieties of Fruits susceptible of being successfully cultivated in each main geographical region of the State, and is annually corrected and revised by the Society. The transactions of the Society's Annual Sessions are furnished to the members of the Association. Annual membership fee, \$2.

T. L. KINSEY, Secretary,

SAVANNAH, GA.

EXTRA TREES OR PLANTS.

It is our practice to always add some additional trees or plants commensurate with the extent of the order. This is a matter which must be left to our discretion, as we cannot take notice of requests naming certain varieties which are to be sent gratis with the order.

FRUIT DEPARTMENT.

APPLES.

OR reliability no fruit excels this. A full crop is certain every alternate year, with a fair return in the intermediate period. Lime and ashes must be given the soil, if naturally deficient in these requisite constituents.

Summer and early Fall varieties of Northern or European origin will succeed equally as well as Southern Seedlings, but the latter are the only reliable varieties for late Fall and Winter. Northern Winter varieties seldom retain their fruit well here after August, as it

decays and falls from the tree during that month.

Some native varieties that keep well, when raised in the upper sections of Georgia and Alabama, fail to retain their keeping qualities when cultivated in the lower or middle sections of these States. Due allowance must, therefore, be made in selecting Winter varieties.

Standards are intended for orchards. For gardens, the Dwarfs, grafted upon the Paradise stocks, are preferable. They bear early and abundantly. They require a rich soil, and such cultivation as is requisite for a garden crop. They can be trained as bushes or small pyramids. Plant so as to leave the connecting point of stock and graft above ground, as the Dwarf becomes Standard when the graft is allowed to strike roots, and to this it has a great tendency. For Dwarfs, Summer and Fall ripening varieties are preferable. Paradise stock stops its vegetation earlier than the Standard, and Winter Apples upon the former do not keep well.

N. B. Our Standard Apple Trees are all grafted or budded upon whole seedling stocks, and not grafted upon pieces to roots. For size and vigor our trees are unsurpassed.

SELECT LIST.

SUMMER VARIETIES.

Astrachan Red. Large yellow, nearly covered with crimson, and fine bloom, juicy, crisp acid; beautiful fruit. Ripens end of May and continues through June. Tree a thrifty and fine grower, bears young and profusely; excellent and pro-

fitable early apple.

Carolina Watson. Very large, oblate conical, green striped with dull red, and a dull red cheek, sweet, crisp and perfumed.

Ripe beginning of July; exceedingly prolific, and a good market fruit.

Early Harvest. Medium to large, bright yellow, tender, juicy, well flavored, a fine market apple, but, as most yellow apples, is soon bruised and turns black; invaluable in any orchard. June 5th, and lasts two to three weeks.

Early Red Margaret. Synonym, Southern Striped June. Small to medium, rather flat, skin yellow, with dark red stripes, sub-acid and high flavor. June 10th, and

lasts until July 20th.

Family. Medium, conical, brown red and narrow stripes, juicy, and highly flavored, Middle of July, and keeps ripening for

six weeks; very productive, and beautiful

Hames. Large to very large, oblong conical, pale yellow, with crimson cheek and dark carmine stripes; flesh rather coarse, white, quite acid, good. Ripens from middle to end of June; a valuable early market fruit, its size being very attractive.

Homony. Synonyms, Summer Queen (incorrectly in Kentucky,) Sops of Wine, Washington, Bennington, etc. Above medium, round or conical, yellow ground, nearly covered with dark crimson and a few stripes; flesh white, tender, vinous, spicy aroma, very good fruit, productive; tree a moderate grower. Ripe end of

Horse. Synonyms, Haas, Summer Horse, Yellow, Red or Green Horse, etc. Large, green, acid, fine for cooking and drying, everywhere known. Ripe during July

and August; very productive.

Jewett's Best. Large, flat or oblate, yellow, with red cheek, sub-acid, with a rich flavor, very good; tree good grower. Ripe end of July.

Julian. Medium, conical, yellow, with bright crimson stripes, crisp, juicy, subacid, and highly flavored; a beautiful fruit. Ripe middle of July; productive, and a fine grower.

Kansas Queen. Large, yellow, nearly covered with crimson; good quality; August;

a very attractive variety.

May Pippin. Small, yellow, good quality, ripens first of the season.

Nantahalee. Large, yellow, highly flavored. July 15th.

Red June. Medium, conical, deep red, juicy and very productive. June 15th to end of July.

Rhodes' Orange. Large, conical, red on orange ground, thickly dotted with russet, sugary, and high aroma. July 15th.

Sweet Bough. Large, yellow, very sweet. Ripe end of June; slow grower.

Washington Strawberry. Large, yellow, mottled carmine, flesh yellow, sub-acid, very good. July.

AUTUMN VARIETIES.

Buncombe. Synonyms, Meigs, Red Fall Pippin, Jackson Red, Robertson's Pearmain, Red Lady Finger, Red Winter Pearmain. A famous North Carolina apple. Large, oblong, greenish yellow, nearly covered with deep carmine, tender, juicy, well flavored. Ripe end of September, and can be kept until New Year; tree upright grower and prolific; an excellent fruit.

Carter's Blue. Synonym, Lady Fitzpatrick. Very large, green, washed dull brown red, and a thick blue bloom, crisp, sugary, with a very rich aroma. Ripe in September; tree vigorous grower and fine shape; an excellent and desirable fruit.

Carolina Greening. Synonyms, Southern Greening, Yellow or Green Crank, Southern or Golden Pippin, Green Cheese, etc. Medium, green or yellow, crisp, sub-acid, fine flavor. Ripe end of September, and will last until January; compact grower and prolific.

Disharoon. Medium to large, yellowish and green, crisp, sweet and good flavor. Ripe end of September and during Octo-

ber; compact grower.

Elgin Pippin. Large, oblate, bright yellow, sub-acid, very rich; an excellent and showy fruit. Ripe August; tree a thrifty grower.

Equinetelee. Synonyms, Batchelor, King, Iola, Ne Plus Ultra, Byers, Buckingham, Kentucky, Queen, etc. Very large, oblate, yellow, with bright red cheek and crimson stripes, flesh yellow, sub-acid, very rich and juicy; a magnificent fruit. Ripe end of September, and last until November; tree compact and vigorous grower, bears young.

Hoover. Synonym, Wattaugah. Large, oblate, dark red, juicy, acid, crisp and good flavor. Ripens September and October; tree vigorous, short-jointed grower, very distinct.

Laurens' Greening. Medium to large, flat, green, crisp, juicy, acid and very pleasant. Ripe middle of September; good grower.

Ripe middle of September; good grower. Mamma. Large, bright red, crisp, juicy and high flavor. Ripe October; a very distinct and vigorous grower, prolific and fine fruit.

Simmons' Red. Large, orange, nearly covered with red; flesh yellow, sugary, good flavor, quality very good. Matures

from June to September.

Taunton. Large, conical, yellow, with dark red cheek, flesh yellow, crisp, high flavored, very acid in rich clay soils, but in sandy loams is unsurpassed in flavor. Ripe beginning of September; tree productive, vigorous, but very open grower, and requires close pruning.

Yopp's Favorite. Large, round conical, greenish yellow, flesh white, tender, juicy, sub-acid, excellent! Ripe September and October; compact grower and productive.

WINTER VARIETIES.

Black Warrior. Above medium, green, quality best, a fine keeper and a first class fruit in every respect; prolific. October to March.

Ben Davis. Synonym, New York Pippin, origin Kentucky. Medium, oblate, greenish yellow with a crimson cheek, sub-acid, fair quality, keeps remarkably well.

Cannon Pearmain. Medium, greenish yellow, shaded red, sub-acid, good, a fine bearer and an excellent keeping apple.

Chattahoochee. Large, greenish, with a red cheek, sub-acid, very good. Novem-

ber to January.

Cullasaga. Large, dark red, crisp, sugary; in sandy soils is apt to be too mealy. Ripens November to January.

Etowah, or Cooper's Red. Doubtless a seedling of Shockley, which it resembles in shape, but more highly colored; flesh crisp, sweet and well flavored, quality good. November to March; a fine keeper.

Hiley's Eureka. Deep red, flesh white, vinous, quality best. December.

Horn. Synonym, N.C. Vandevere. Medium, flat or conical; here and further South dark crimson; further North green with red cheek, juicy, rich. Ripens November, and has been kept until March; tree open grower, productive.

Hockett's Sweet. Large, red, striped and dotted with darker red, flesh juicy, crisp, sweet, a very good fruit. October to Feb-

ruary.

Kittageskee. Medium, yellow, with small black specks, flesh firm, pale yellow, highly flavored, spicy and juicy. Ripens November, and keeps well; very prolific, tree a luxuriant grower, rather open when young.

Mangum. Synonyms, Carter, Gully. Medium, red striped; flesh firm, juicy and well flavored. Ripe in October, and keeps well; productive, tree a vigorous,

compact grower.

Maverick Sweet. Large, oblate, green, with dark red cheek and much bloom, flesh crisp, very sugary and of high aroma, a fine fruit. Ripers October, and

keeps well; tree good grower.

Moultrie's. Large, very flat, green, with red stripes, crisp, juicy, sub-acid. Octo-

ber to January.

ryor's Red. Large, red, russety, tender, juicy, sub-acid, rich. November to March; Pryor's Red.

a good fruit and thrifty tree.

Romanite. Fruit similar to Shockley; tree of a more open growth, branches slender, and very distinct in foliage and in appearance; possesses all the bearing and keeping qualities of the Shockley, always heretofore considered as identical with it.

Sauta. Large, greenish yellow and russet; quality good; a good keeper. October to

March.

Shockley. Synonyms, Waddell Hall, Sweet Romanite. Medium, conical, always regular, yellow with a bright crimson cheek, flesh firm, sweet or sub-acid, with some flavor. Trees very erect, vigorous, exceedingly productive; ripens in October, and has been kept until following August. Although this apple cannot be classed as first quality, it is yet the most popular Winter variety we cultivate. It produces large and regular crops, the fruit is uniformly of fine size, beautiful in appearance, and the tree bears very young.

sandy loam. Stevenson's. Medium to large, green, covered with brown, flesh firm, juicy and spicy, a regular bearer, and keeps until

April; tree a fine grower. Wine Sap. Small to medium, red, vinous,

quality very good; a good keeping apple. Yates. Synonym, Red Warrior. Small dark red, dotted with small white dots, flesh yellow, firm, juicy and very aromatic; immense bearer and good keeper.

N. B.-Nearly all Winter Apples commence to be in eating condition here in October, and if properly taken care of in a cool, airy room, free from frost, the larger number can be kept through the Winter.

CIDER APPLES.

Hewes' Virginia Crab. Small, dark red, regular and profuse bearer. October to March. Waugh's Crab. Small, yellow, with red cheek, profuse bearer. Yates. See description above.

APPLES FOR ORNAMENT OR PRESERVING.

Double Flowering Crab. Flowers double, very fragrant, fruit very small, highly orna-

Siberian Crabs. They produce large crops of small fruit, much esteemed for preserving; trees are also very ornamental. The best varieties are Golden Beauty, Red and Transcendent.

SUMMER PEARS.

*Bartlett. Large, buttery, melting, rich flavor, very popular. Ripens end of July

and during August.

Synonyms, Seigneur *Belle Lucrative. d'Esperen, Fondante d'Automne. Large, melting, delicious, fine grower, bears abundantly and regularly. End of July and August.

Medium, buttery, melting, Bloodgood.

good grower. July. Buerre Giffard. Medium, juicy. Middle of June, tree a straggling grower.

Buffum. Small or medium, buttery, sweet and high flavor, productive, tree a compact grower. August.

*Clapp's Favorite. Large, of very good quality, showy, and becoming quite popular; ripens with or before the Bartlett.

Doyenne d'Ete. Small, melting, very good, tree a moderate grower. Beginning of June. *Flemish Beauty. Large, melting, sweet,

handsome. August.

Howell. Medium, very rich and juicy, a good bearer and fine fruit, tree an open grower. Beginning of August.

Henkell. Large, melting, juicy, best. July. *Madeleine. Small, melting, sweet, very early.

Osband's Summer. Small, very good. Beginning of July; fine grower.

Ott. Small, highly flavored, excellent grower, seedling of Seckle. Middle of July.

Petite Marguerite. Small, very early, an improvement upon Doyenne d'Ete. Beginning of June.

Philadelphia. Large, melting, very good.

Middle of July.

Rostiezer. Medium, juicy and well flavored, tree vigorous, but of open growth. July.

Seckle. Small but exquisite, tree a stout,

slow grower. August.

St. Michael Archangel. Large, melting, very good, beautiful pyramidal tree. August.

Stevens' Genessee. Large, round, melting,

vigorous grower.

Urbaniste. Large, buttery, very good, moderate grower.

AUTUMN AND WINTER PEARS.

Beurre d'Anjou. Large, juicy, melting, sometimes a little astringent, fine tree and

regular bearer. September.

*Beurre Clairgeau. Large, melting, sweet, a reliable variety, regular bearer, tree of stout growth, best on standard. September and October.

Beurre Diel. Very large, buttery, rich,

vigorous grower. September.

Beurre Easter. Large, melting, very good, good grower. Ripens in November, and can be kept until Spring.

Beurre Langelier. Medium, juicy, vinous and good. October and November.

Beurre Superfin. Large, melting, subacid fine tree and regular bearer. August. *Doyenne Boussock. Very large, melting, vigorous grower. August.

Doyenne Sieulle. Medium, very good,

quite late.

Duchesse d'Angouleme. Very large, melting, juicy and well flavored, best on quince, tree vigorous grower, and the most reliable bearer of all our good Pears. End of August and September.

Glout Morceau. Large, melting, first quality, tree a perfect grower, best on quince, but does not bear young. October to De-

cember.

Hebe. Very large, rather course, juicy and of fair quality, keeps well; originated in South Carolina, and is supposed to be a seedling of Easter Beurre. Tree thritty.

*Lawrence. Very large, melting, rich, tree a remarkable fine grower, best on stand-

ard. September and October.

Onondaga. Large, melting and well flavored tree vigorous. September.

Passe Colmar. Medium to large, buttery, tree slender grower. October to November.

*Winter Nelis. Medium to large, buttery, juicy and good flavor, tree slender and somewhat straggling grower. October to December.

NEW HYBRID PEARS.

Garber's. A seedling of China Sand, raised by Dr. J. B. Garber, of Pennsylvania; large, greenish yellow, flesh white, buttery, sweet, quality good; matures in October; tree a remarkable grower, and said to be free from blight. 50c. each

Kieffer's. Origin near Philadelphia, where the original tree, now 16 years old, has not failed to yield a large crop of fruit for eleven years past. It is a seedling of CHINA SAND Pear, supposed to have been crossed with Bartlett. So far it has been entirely blight proof. Fruit medium to large, affecting the ovoid or egg shape; skin yellow, with a bright vermillion cheek; flesh brittle, very juicy, with a marked musky aroma, quality very good. Matures from September to October. very vigorous, healthy foliage, and in every respect similar to LeConte, except that its leaves are more narrow. Succeeds best on pear stocks. It bids fair to become more popular than LeConte, which it sur-

passes in quality, appearance, as well as in early bearing.

1 year old, Standard, 50c. each; \$40 per 100. 2 years old, " 75c. each.

LeConte or Chinese Pear. Supposed to be a hybrid between the old China Sand Pear and a cultivated variety. Fruit large, pyriform, skin smooth, pale yellow, quality very variable, usually of second quality, but if allowed to mature slowly in a cool dark room or in drawers, its quality improves remarkably. Maturity from July 20th to end of August. The tree is of remarkable vigor and rapid growth, foliage dense and luxuriant, hardy everywhere, but of greatest value South. So far it has been nearly free from blight. Trees begin to bear fruit when 4 years old, and should be planted at least 20 feet apart. 1 year old, Standards, 50c. each; 30 per 100. 3 feet, 25c. each; \$20 1 year old, per 100.

Smith's Hybrid. Not fruited here, but as

vigorous as the above.

CHINESE AND JAPANESE PEARS.

While none of the varieties of this class are of a quality that will admit them among our good table sorts, yet they are so wonderfully healthy, of such luxurious growth, and very prolific in fruit bearing, that they may be used in the production of seedlings from which a new race of good pears will doubtless be derived. From the crossing of these varieties with our leading sorts, we may, ere long, expect a new race of Pears, combining great vigor of growth, entire freedom from blight, with great fertility and good quality of products. They are offered solely with this end in view, and we believe them, therefore, worthy of the attention of progressive pomologists.

The varieties are all of the type of the old China Sand, but with still larger leaves.

Fruit is much esteemed for preserving, canning and drying.

Daimyo. Very large. Ripens October. Mikado. Medium, round, russety. September.

Madame Von Siebold. Small. September to October.

Hawai, or Sandwich Island. Medium. September. Foliage very luxuriant.

Standard Trees, 1 year old, 50c. each. No. 1403, 1404, 1405 and 1407 are of Chinese origin; trees of rather straggling growth. 1 year old trees, Standard, 50c. each.

CHERRIES.

PRICES OF TREES.

One year old, fine, 5 to 7 feet, 25c. each; \$2.50 per 12; \$20 per 100.

well. Dwarfs grafted upon the Mahaleb are only possible here; this stock adapts itself to more varieties of soil than the Mazzard or Standard stock.

HEART AND BIGARREAU CHERRIES.

Fruit heart shaped, flesh tender, sweet; trees vigorous, with spreading branches and luxuriant foliage, leaves drooping.

American Amber. Yellow.
Black Tartarian. Large, black.
Buttner's Yellow. Clear yellow, early. Cleveland Bigarreau. Amber, shaded red. Coe's Transparent. Amber and pale red. Early Lamaurie. Large, dark purple. Elton. Pale yellow, red cheek.

Governor Wood. Large, yellow and red. Kirtland's Mammoth. Large, yellow and red Luelling. Very large, black, very fine.
Noir de Schmidt. Very large, black.
Ohio Beauty. Light red.
Rockport. Bright red. Werder's Early Black. Black, early.

DUKE AND MORELLO CHERRIES.

Flesh usually acid or sub-acid, tender, melting and pleasant. Trees of more bushy and compact habit, and of smaller growth.

Belle de Choisy. Bright red, early. Belle et Magnifique. Bright red. Belle de Montreuil. Large, red, sugary,

early, very productive.

Early Richmond. Deep red, valuable.

Empress Eugenie. Large, deep red. May Duke. Dark red, a popular sort. Montmorency Ordinaire. Large red. Olivet. Large, red, a valuable new sort. Royal Duke. Dark red.

PLUMS.

IMPROVED CHICKASAW TYPE.

Varieties of this type are less liable to attacks of curculio than those of European origin, and combine vigor of growth with great productiveness.

PRICE OF TREES.

1 year, very fine, 25c. each; \$2.50 per 12; \$15 per 100.

Cumberland. Originated near Augusta from seeds collected upon the Cumberland mountains in 1864. Large, yellow, juicy, sweet, good. Maturity, August and September.

De Caradeuc. Medium, round, yellow with brown red cheek, juicy, sweet and of fine flavor. Beginning of June. This va-riety is doubtless a hybrid between the Chickasaw and an European variety, and is remarkably fine.

Newman's. Medium, bright red, cling, fair quality. Ripens middle of July.

Wild Goose. Large, somewhat oblong, bright vermillion red, juicy, sweet, good quality, cling. Ripens middle of June; a very showy and fine market fruit; pro-iific bearer. Most profitable of all.

N. B -All these Plums should be picked when they commence coloring and ripened in the house. In three days time they will acquire a brilliant color. If left on the tree too long, the fruit drops and never attains the quality of that which is house-

This gradual ripening allows ripened. these varieties to carry perfectly to distant markets.

ADDITIONAL AMERICAN VARIETIES.

Peachleaved or Kanawha. Medium, oblong, bright vermillion, juicy, fine flavored; quality very good. Ripens in September. Although it colors as early as July, it is not fit for use until it ripens upon the tree. An excellent late variety.

Read. A new variety, red, very good and prolific. Ripens in August.

FOREIGN VARIETIES.

Imperial Gage. Fruit very large, vellow, succeeds occasionally when planted in a poultry yard.

Morocco or Mogul. Small, purplish, prolific; succeeds quite well everywhere, and

is quite free from curculio.

Shropshire Damson. An English variety resembling the Blue Damson, but comparatively free from curculio; blooms late, and is quite prolific.

KELSEY'S JAPAN PLUM.

[From the Pacific Rural Press, April 28th, 1883.

"This remarkable plum was imported from Japan in 1871 by the late John Kelsey, of Berkeley, California, whose name has been given to the fruit as a just tribute to the memory of one of California's pioneer leaders in Horticulture, and the first producer of a fruit that has any promise of being one of the greatest acquisitions to our already long list of plums.

The trees at first received little attention, the merits of the fruit not being known. They were allowed to stand in the nursery rows until they fruited, after which they were transplanted to the orchard, where there are at present upwards of one hundred trees, which have been in bearing since 1876, and have never failed to produce all the fruit they

The following points of excellence are claimed for it:

1st. Its wonderful productiveness is unsurpa sed by any other plum, either native or

2d. It comes into bearing at the age of two to three years, blossoms appearing frequently on yearling trees.

3d. The fruit is of very large size, being from seven to nine inches in circumference. and specimens weighing six and a half ounces each; it has a remarkably small pit.

4th. It is very attractive in appearance, being of a rich yellow, nearly overspread with bright red, with a lovely bloom. It is heart shaped. It ripens from first to last of September.

5th. It is of excellent quality, melting, rich and juicy; its large size renders the paring of the fruit as practicable as the peach, which is quite a novelty, and it excels all

other plums for canning.

As a dried fruit it is destined to take the lead, equal to, if not surpassing the best dried prunes. Experiments resulted in yielding nineteen and a half pounds of dried fruit

to the 100 pounds of fresh fruit.

"In texture it is firm and meaty, and it possesses superior qualities for shipping to long distances; it remains solid longer than any other variety. Specimens were shipped to Thomas Meehan, Esq., editor of the Gardner's Monthly, Philadelphia, in October 1882, who reports the 'flesh firm and flavor admirable.' The California State Horticultural Society, on October 27, 1882, reports, through its Committee on New Fruits, on this variety, and advises fruit growers to give attention to this plum."

It should be stated that this fruit bears no relation whatever to the fruit more commonly called Japan Plum in Florida and Louisiana. The latter is the true Japan Medlar, an evergreen tree, and botanically known as the *Eryobothrya Japonica*, or *Mespilus Ja*-

ponica.

We have cultivated the Kelsey Plum two years. The tree resembles in appearance our vigorous varieties of the Chickasaw type; they are hardy and of vigorous growth. Having received our grafts from one of the originally imported trees, and after the latter had yielded several crops of fruit, we have thus avoided the confusion as regards several other varieties of Japan plums which we have cultivated for years past, but none of which are of special value here.

Several of our correspondents of the Pacific coast have fully endorsed the great value of Kelsey's Japan Plum, and from the most trustworthy reports we fully believe that this new fruit will be of great value to the Southern States, and soon become as popular as the

now far famed Japan Persimmons.

One year old trees, \$1 each; June buds, two feet, 75c. each

PEACHES.

PRICES OF TREES.

SANDY loam is most suitable to the Peach, still it will adapt itself to almost any soil, provided it is well drained. Plant one year old trees cut back to two feet. The trees must be pruned every year by cutting off one-half of the previous year's growth. To prevent the attack of the borer, hill up the tree in April and level off again in November; the hard bark of the body will prevent the insect from puncturing it, and if any eggs are by chance deposited they can be easily destroyed.

SELECT LIST.

FREESTONES.

Amelia. Synonyms, Stroman's Carolina, Orangeburg, Rayzer's June, etc. Very large, eonical, white, nearly covered with crimson, juicy, melting, vinous, sweet, and of high flavor. Too tender to stand long carriage, but as a Peach for home consumption is truly magnificent. July 1st to 10th.

Albert Sidney. Medium, oblong, yellowish white, with red cheek; flesh melting, and of highest flavor. Middle to end of July.

Of Chinese type.

Alexander. Above medium, highly colored in clay soils, less in light soils, flesh greenish white, very juicy, vinous and of good quality, adheres to the stone. Matures from May 20th to May 30th in Au-

gusta. Trees are remarkably prolific, and bear very young; a most valuable market fruit, as it is the earliest to ripen.

Note—Since the introduction of the Alexander, a very large number of new seedlings have been brought before the Horticultural world. Nearly every one is said to be earlier in maturity or of larger size. After several years of fruiting, the conclusion is that the bulk have a common origin, being, as is believed, seedlings of Hale's Early, and so near alike in size, flavor, growth, season of maturity, and other characteristics, as to puzzle the best growers to detect any difference between them. They are nearly all reproductions of Alexander. While some varieties may mature earlier in

certain localities than others, the result of a series of years has been that these peculiarities are not permanent, but that early maturity is influenced mainly by locality and condition of the weather in May. We have, therefore, discarded the propagation of the following so-called varieties and given precedence to Alexander as best, largest, earliest and best for shipping, viz:

Amsden, Brice's Early, Brigg's May, Cumberland, Gov. Garland, Honeywell, Musser, Saunders, Waterloo, Wilder, etc., etc.

Baldwin's Late. Large, oblong, greenish white, with red cheek, juicy and well fla-

vored. October 10th.

Beatrice. Small to medium, deep red and mottled deeper red, flesh juicy, vinous, and of good quality; matures immediately after Alexander; trees are exceedingly prolific; fruit needs thinning so soon as set, otherwise it is too small; fills

the gap between Alexander and Hale's Early. Maturity June 1st to 10th. Columbia. Synonyms, Pace, Tinley's Su-perb, Stephen's, Yellow Indian, etc. Very large, skin downy, dingy yellow, and striped with dull brown or red, flesh vellow, buttery, melting and exceedingly rich. Ripe about July 20th, and continues for a month; a popular Southern type, which is easily reproduced from seed.

Crawford's Early. Large, yellow, with red cheek, flesh yellow, juicy and rich, very productive, a standard market variety. Ripe from 1st to 10th July.

Above medium, white, with a pale red cheek, flesh white, juicy and well flavored. Middle to end of September. An improved seedling of Lady Parham.

Early Louise. Larger than Early Beatrice. which it succeeds in immediate maturity; very thin skin and delicate aroma; excellent variety for home consumption only, as it is too tender to carry great distances. Maturity from June 8th to 15th; tree very prolific.

Early Rivers. Large to very large, pale greenish white, flesh white, sub-acid. very vinous and very juicy, of exceedingly delicate flavor, skin very thin; maturity June 10th to 20th; unfit to carry great dis-

tance, very prolific.

Early Tillotson. Medium, white, covered with red, melting, good, very prolific, a favorite market variety, stands shipping well. Ripe from June 15th to 25th.

Elberta. Large, yellow, with red cheek, juicy and high flavor, flesh yellow, supposed to be a seedling of Chinese Cling. Ripe middle of July; an excellent ship-

ping variety.

Fleitas or Yellow St. John. Large, roundish, orange yellow, with a deep red cheek, juicy, sweet and highly flavored, flesh yellow. Ripens with Early Tillotson and lasts longer. Origin New Orleans; identical with May Beauty of Louisiana.

Foster. Resembles Early Crawford, but a few days earlier.

Great Eastern. Very large, (often measuring 14 inches,) greenish white, with a slight wash of red, flesh juicy and sweet, sometimes a little coarse, a showy fruit. Originated in our orchard. July 20th.

Hales Early. Above medium, white with red cheek, flesh white, melting, vinous and very good; very productive. Maturity from June 5th to 15th, and continues until the 25th to 30th. In some localities this variety is predisposed to decay, and therefore almost worthless. In others, however, it has proven to be an early and good flavored variety, and more free from decay than the varieties ripening immediately after it. Wherever it is successful it has given large profits. With us it is the only variety that has not failed to give fruit during the last fifteen years; while in some seasons almost every variety of peach failed to give fruit, our Hale's have not missed a crop.

Honey. Medium, oblong, with a sharp recurved point, creamy white, washed and mottled carmine, flesh of a peculiar fine texture and a honey sweetness; tree very thrifty, distinct grower and prolific. Ripe about June 25th. The fruit is apt in some soils to be devoid of flavor. Originated by Charles Downing, Esq., about 1854; from pits sent from China. First trees sent out by us in 1858. Is very successful in Florida. Reproduces freely

from seed.

Mountain Rose. Large, white, washed with carmine, flesh tinged pink, juicy, vinous, sub-acid and good flavor; very good. Ripens June 25th, or immediately after Early Tillotson; an excellent early market variety, and superior to Early York.

Muscogee. A variety of the Columbia, with white flesh, size large, skin dingy vellow, nearly covered with crimson, red and dark brown cheek, spotted and somewhat striped like the Columbia; flesh white, with some red veins around the stone, melting, juicy and very good. Maturity beginning of August; freestone.

Osceola. Large, golden yellow, with orange cheek, and a few red veins, flesh golden yellow, sweet, buttery, and with an apricot flavor; belongs to the Indian type.

Beginning of September. icquet's Late. Very large, yellow, with Picquet's Late. a red cheek, flesh yellow, buttery, rich, sweet, and of the highest flavor. Maturity from end of August to middle of September. Originated by Antoine Picquet, Esq., Belair, Ga. First trees disseminated by us in 1860. This variety seldom fails to produce a crop of fruit, and after twenty years test is considered the most profitable late yellow peach South and

Reeve's Favorite. Large, oblong, skin deep yellow with orange cheek flesh juicy and buttery, very sweet, good. Ripens July 15th.

Stephen's Rareripe. Large, oblong, skin greenish white with pale red cheek, flesh

white, red at the stone, juicy, vinous, subacid, very good. July 25th to August 15th.

Stump the World. Very large, white, with bright cheek, flesh white, juicy and of good flavor, stands carriage well and is a fine market variety. July 20th, and lasts three weeks.

Susquehannah. Very large, yellow, with red cheek, flesh yellow, rich, juicy, and of high flavor, superior to Late Crawford. End of July.

Thurber. Large to very large, skin white, with light crimson mottlings, flesh very juicy, vinous and of delicate aroma, of exceedingly fine texture. Maturity middle to end of July. A seedling of Chinese Cling, which it resembles in size and beauty, but perfectly free. This variety has not failed to yield a crop of fruit during a period of fifteen years, and is highly prized as a market sort by Western growers. Originated by Dr. L. E. Berckmans, and trees first disseminated by us in 1873.

CLINGSTONES.

Annie Wylie. Large, white, with red cheek, flesh very juicy, vinous and of best quality. Maturity September 1st to 10th.

Bustion's October. Large, pure white, a

very good late variety.

Chinese Cling. This type has of late years produced several improved seedlings, which, although not all attaining the enormous size of the original variety, are, however, of better flavor and less predisposed to decay, and of less straggling habit of growth. The best sub-varieties are:

Chinese Cling-Gen. Lee. Above medium, oblong, c reamy white, with carmine wash, flesh very finely grained, melting, very juicy and of high flavor; quality best.

July 1st to 10th.

Chinese Cling-Stonewall Jackson. Almost similar to Gen. Lee in size and quality, but a week later, and tree a more compact grower. July 15th to 25th. Croft's Golden. Very large, deep yellow

and crimson cheek, flesh yellow, sub-acid, vinous and well flavored. End of July to

August 10th.

Darby. Large, round, skin creamy white, with a pale white blush on one side, flesh pure white to the skin, juicy, sweet and of good aroma, quality very good. Maturity middle to end of October; an excellent late peach; origin Newberry, S. C.

Duff Yellow. Very large, yellow, with red wash, juicy, sub-acid, showy fruit. July

10th.

Demming's September. Large, oblong, with a protuberance, yellow, with red cheek, flesh yellow, red near the stone, juicy, vinous and good, resembles Lemon Cling, but one month later.

Eaton's Gelden. Medium, skin golden yellow, with occasionally a few pink spots, flesh yellow, sweet, juicy, with apricot flavor. Middle of September. A supe-

rior variety for canning.

Flewellen. Large, deep red, with deeper red veins, flesh red, juicy, vinous, very good: belougs to the Indian type. July 20th.

General Taylor. Medium, round, skin

white, nearly covered with red, flesh juicy, sweet. Ripens July 1st; origin Missis-

Goode's October. Large, skin white, washed and veined pale red, flesh white, with red veins, juicy, vinous and well flavored, of the Indian tyye. Beginning of October.

Heath Red. Large, oblong, skin creamy white, with red wash, flesh juicy, vinous and well flavored, red near the stone.

August 25th.

Heath Late White. Synonyms, White English, Eliza Thomas, Potter's September, Rauy Peach, White Globe, Henrietta, etc., etc. Large, oval, with a sharp apex, skin creamy white, very seldom with any red, flesh pure white to the stone, juicy, sweet and good aroma, very popular for preserving. Ripens beginning of September. There are numberless local names for this peach, which reproduces itself from the seed with slight variations.

Indian Blood. Large, dark claret, with deep red veins, downy, flesh deep red, very juicy, vinous and refreshing. Middle

of August.

Newington Cling. Large, oblong, white, slightly tinged with red and a red cheek, flesh firm, juicy and well flavored. August 10th.

Old Mixon Cling. Synonym, Congress Cling. Large, oblong, creamy white, with much red, juicy, sweet and well flavored.

End of July.

Pine Apple. Synonyms, Lemon, Kennedy's Carolina, Allison, Early Lemon Cling, etc. Large, oblong, with a protuberance like a lemon, skin golden yellow, tinged with dark red, flesh yellow, slightly red at the stone, juicy, sub-acid, excellent; reproduces from the stone with slight varia-tions. Middle of August.

Shelby. Large, white with red cheek, very

juicy and well flavored. End of July to

August 5th.

Tinley's October. Medium, white, with a wash of red, flesh white, juicy, vinous and of high flavor. Middle of October.

Tuskena. Above medium, oblong, skin | White July. Flesh, fine grained, very vellow and deep orange red, flesh subacid, vinous, good. Ripens end of June; origin Mississippi.

vinous, sub-acid, high flavor, white to the stone. Middle of July.

ORNAMENTAL PEACHES.

25 cents each.

Double Flowering. Crimson, Pink and

White. Beautiful in early spring.

Italian Dwarf. Grows five feet high, makes a bush, leaves very large, fruit large, green, flesh white, juicy, with almond flavor, free. Ripens end of August.

Pyramidal. Grows to a height of twenty feet in a compact form, like the Lombardy Poplar.

Purple Leaved. An early ripening variety of Heath Cling, with deep blood red leaves in Spring.

Van Buren's Golden Dwarf. Grows six to eight feet high, of a compact habit; fruit very large, similar to Lemon Cling, and of good quality; suitable for city gardens, or where space is limited.

Weeping. Curious weeping habit, produces a tolerable fruit.

LEADING VARIETIES FOR MARKET,

IN ORDER OF MATURITY.

Freestones. Alexander, Early Beatrice, Hale's, Early Tillotson, Fleitas St. John, Mountain Rose, Crawford's Early, Old Mixon Free, Susquehannah, Thurber, Stump

the World, Columbia, Picquet's, Cora, Baldwin's Late.
(ling. Tuskena, Gen. Taylor, Chinese, Old Mixon, Croft's Golden, Pine Apple, Indian Blood, White Heath, Eaton's Golden, Tinley's, Darby.

PEEN-TO, or FLAT PEACH OF CHINA.

Price 20 cents each; per 100, \$15; per 1000, \$125.

This remarkable Peach originated in our Nursery from pits sent from Australia in 1869. Although very hardy here, the tree has produced fruit but very seldom; owing to its habit of blooming in January. In Florida, however, this tree has succeeded admirably. In Pensacola it produced the enormous amount of 1,200 peaches upon a three year old tree. Reports from Florida state that this peach, together with the Honey and the several sub-varieties of the Chinese Cling and Free, succeed there when the other varieties of the common or Persian strain prove of little or no value. Fruit 2 to 22 inches in diameter, very flat, skin pale greenish white, with a beautiful mottled red cheek, peels readily at maturity, flesh very finely grained, juicy and dissolving, with a delicate almond aroma, quality best; clingstone. Maturity in Florida from April 15th to May 10th.

This peach colors a long time before maturity or full development, and is therefore often gathered prematurely, which renders it unfit for use. It should be allowed to hang upon the tree until appreaching full maturity, when it shows its excellent quality and can then be shipped safely to distant markets. Last year the early shipments made before this fruit was developed created a bad impression on the Northern markets, yet those who gathered at proper period of maturity received from \$10 to \$25 per bushel, and some exceptionally good lots yielded at the rate of \$50 per bushel. These results prove its great value for the orange growing belt, and are to us a source of gratification in having added this valuable peach to the fruit growing resources of Florida.

NECTARINES.

Price, 15c. each; \$1.50 per 12.

Require the same culture as the peach. The fruit having a smooth skin, is very liable to the attacks of the curculio. They ripen through July and part of August.

Boston. Yellow, sweet, freestone. Coosa. Very large, red, flesh white, very good; a new seedling from Upper Georgia.

Early Violet. Small, green, nearly covered with purple, good. Golden Cling. Medium, yellow, good, cling.

New White. Large, pure white, flesh tender, juicy, vinous, very good, early, free. Stanwix. Green with violet cheek, juicy,

sweet and very good. Victoria. Medium, with purple brown cheek. July.

FIGS.

25 Cents each; per 12, \$2.

Angelique or Early Lemon. Small, greenish yellow, early.

Brunswick or Madonna. Very large, violet, good and productive.

Black Ischia. Medium, blue black, good. Brown Turkey. Medium, brown, very sweet and excellent, very prolific and hardy. The most reliable for open field culture. Blue Genoa. Medium, bluish black.
Celestial. Small, pale violet with bloom,
very sweet, prolific and hardy.
Green Ischia. Green, with crimson pulp,
very good and prolific.
Lemon. Large, yellow, sweet.
Madeleine. Small, white.
White Marseilles. White.

APRICOTS.

Price 25c. each; \$2.50 per 12; \$20 per 100.

This fruit is unsuited to open field culture. Late Spring frosts often destroy the trees. It is eminently successful in towns, or if protected by surrounding buildings. They ripen from beginning of June to end of July. The best varieties are:

Breda, Jamucett, Gloire de Pourtales, Early Golden (Dubois,) Red Roman, Royal, Large Red, Moorpark or Peach, St. Ambrose,

The BLACK APRICOT is more like the Plum; it is more hardy in open culture, produces regular crops of a fair fruit, which ripens early in June.

QUINCES.

Price 25c. each; \$2.50 per 12; \$20 per 100.

Angers. Large, pear shaped, thrifty grower.

Apple or Orange. Large, round, most esteemed for preserving; grafted trees.

Chinese. A most extraordinary fruit, oblong, of immense size, often weighing from two to two and a half pounds. Growth rapid and distinct. Blooms very early in Spring, but withal seldom fasls to produce a crop. Fruit rather coarser in texture than the preceding; grafted trees.

JAPANESE PERSIMMONS.

(DIOSPYROS KAKI.)

Five fruit seasons just passed have satisfactorily settled the question as to the value of this fruit for the cotton growing belt of the Southern States, where the tree is entirely hardy. The merits of this fruit are the early bearing age of the trees as well as wonderful fertility, as it is quite common to see one year old trees planted in Spring produce a crop of from 20 to 50 well developed persimmons the following year. This precocity of overbearing should be checked by removing the largest proportion of its fruit when fully set in April or May, and leaving only a number commensurate with the age and size of the tree.

The fruit of all the varieties described is of a bright orange red or light vermillion color; in shape and general appearance resembling a large smooth tomato. The flesh is soft, with a pleasant, sweet, slight apricot flavor. It begins to color when half grown, but should be allowed to hang on the tree until just before a frost is expected, or in the case of the early ripening varieties when fully soft. If gathered before a frost there is a slight astringency next to the skin, but this disappears after being kept in the house a few days or weeks. If allowed to be slightly touched by frost the flavor is much improved, but the

fruit will then not keep many days. It is therefore desirable to gather the fruit before frost if intended for keeping, and then some varieties will remain sound until January and February.

There are many varieties of the Persimmon raised in Japan; some are eaten in a fresh state, others are used for drying. Samples of dried Persimmons have been sent from Japan, and they are equal to the best Smyrna figs, but with a peculiar and pleasant aroma.

We have quite a large stock of trees grown in our Nurseries here, still the difficulty of securing sufficient wood for graiting will cause our stock to fall short of the demand.

Our Trees are all grafted upon native stocks and well rooted; they are in every respect superior to the imported trees, which are usually deficient in roots. We have no seedlings to offer. Grafted trees alone are of any value. Seedlings seldom give good results, as not over three per cent. prove to have perfect flowers, the others being male and thus barren; specimens of the fruit grown here have nearly all been seedless.

Price of trees, home grown, 2 to 3 feet, 50c. each; per 12, \$5.
" 4 to 5 feet, 75c. each; per 12, \$7.

Among. Round, nearly globular, orange red, average 2½ inches in diameter, very good, exceedingly prolific, and of comparative dwarf growth; keeps very late.

Hacheya. Synonyms, Yomato, Imperial, etc. Usually oblong, $2\frac{1}{2}$ by $3\frac{1}{2}$ inches, still perfectly globular specimens are often as numerous as the former; orange red, good quality, keeps late.

Hyakume. Synonyms, Pound, Seedless, Ta-nenashi, Minokaki, etc., etc. Very large, nearly globular, deep orange red, average 3 inches in diameter. Nearly always seed-

less. Keeps late.

Kurokumo. Round, somewhat flattened and ribbed, bright vermillion, average diameter 3 inches, very good. Can be eaten when quite solid, but improves by keeping until soft.

Zingi. The smallest of the list, nearly globular, average 2 inches. Pulp quite dark, very sweet and rich, best quality, very productive. Matures during October.

STRAWBERRIES.

For family use the plants can be cultivated in regular beds, with the rows sufficiently apart to cultivate the ground thoroughly, or along garden walks. Manure the ground well and plough deep before planting. Nothing equals a compost of cotton seed and stable manure well mixed with the soil, and a top dressing of cotton seed between the plants so soon as set in fall; leave this all winter and fork in slightly in March. Ashes are also very good as a top dressing. After the crop is gathered, keep the soil well stirred and always free from weeds. If you expect a large yield of fruit, give the soil liberal manuring.

We have tested hundreds of varieties and find but few that will give general satisfaction. Locality influences this fruit more than any other cause, and we cannot therefore depend upon the same variety thriving equally well in different soils. The following varieties, however, will be found suitable to most soils. All have perfect blossoms.

LEADING MARKET VARIETIES.

Charles Downing. Large, bright crimson, quality best; succeeds everywhere; although not so prolific as some others, it suits all soils. Per 100, 50c.; per 1,000, \$4.

Kentucky. Large, irregular and bad color, sweet, quality very good, in demand when known in a market. Prolific. Per 100, 50c.; per 1,000, \$4.

Monarch of the West. Very large, pale red, not of the first quality, but very prolific, early and of vigorous growth. A profitable market variety, as it is the earliest to ripen. 75c. per 100; \$5 per 1,000.

Sharpless. Very large, irregular, deep red, sweet and of very good flavor. Vigorous grower and prolific. A valuable market variety, as the berries are uniformly large. 75c. per 100; \$5 per 1,000.

Wilson's Albany. Large, always regular, high lavor, sub-acid, prolific, vigorous grower. No variety combines more qualities; after 25 years trial everywhere it stands unsurpassed for market or family use. 75c. per 100; \$5 per 1,000.

Our stock of plants of the above varieties is very large and unmixed. Prices for 5,000, 10,000 or upwards on application.

SELECT NEW AND OLD VARIETIES FOR AMATEUR CULTURE.

Price, \$1 per 100.

Captain Jack. Medium, deep red, second quality, but very prolific and profitable for market in some soils.

Crescent. Large, bright scarlet, of good flavor and very prolific, if cultivated near other varieties, as its flowers are pistillate; a very vigorous grower, are under favorable circumstances a very valuable market sort.

Crystal City. Medium, quality inferior, but ripens here from a week to ten days

earlier than any other variety.

Duchess. Large, regular, bright red, good

quality, should be grown in hills. Glendale. Large, oblong, deep scarlet, high

Pioneer. Large, long, bright red, quality best; a beautiful variety, requires high culture.

Seth Boyden. Large, regular and of very good quality, an old but still desirable

variety.

Triomphe de Gand. Large and regular, quality unsurpassed; as an amateur variety it has no superior, but requires high cultivation.

TIME OF ORDERING PLANTS.

Plants can be furnished in small quantities during September and October, providing the season admits of their being dug. If the weather is very dry during these months we cannot fill orders until there is sufficient rain to moisten the soil.

Large orders can be filled after October 15th.

NATIVE GRAPES.

We will furnish 12 strong vines in 12 varieties, for table use, our selection, for \$2.

SECTION I.

Varieties belonging to Vitis Labrusca or Fox Grape.

LEADING MARKET AND WINE GRAPES IN LARGE TYPE.

All these varieties have more or less pulp or foxiness, although in some varieties it is scarcely perceptible. Bunches generally large; berries large. | Each | Per 12 | Per 100 Per 1000

claret wine	10	1	00	4	00	
HUMBOLDT. Bunches medium, compact, berry medium, round, pale green or yellowish, sweet, juicy and good fla-						
vor; promises to become a popular variety for white wine.						
Vine very vigorous	25	1	50	10	00	
good flavor, prolific bearer and vigorous grower	25		50			
UHLAND. White; resembles NOAH	25	1	50	10	00:	

SECTION IV.

VITIS ROTUNDIFOLIA or VULPINA—Bullace or Muscadine Type.

This type is purely Southern, ranging from North Carolina to Texas, and of no value for the Northern or Western States. Although known for upwards of three hundred years, it is only within a short period that its improved varieties have been largely cultivated. The product is very large, and the cultivation reduced to the simplest form. Vines should be planted from twenty to thirty feet in the row, trained on arbors or trellis, and never trimmed.

Each	Per 12	Per 100	Per1000
Flowers. Bunches composed of from fifteen to twenty-five			
berries, which are dark black and of sweet vinous flavor.			
Matures end of September to end of October, or from four			
to six weeks later than the Scuppernong. 1 year	\$1 50	\$8 00	
SCUPPERNONG. Bunches seldom ever composed of more than			
eight or ten berries; berries large, round, of a bronze			
color when fully ripe, skin thick, flesh pulpy, very vinous,			
sweet, and of a peculiar musky aroma, exceedingly pleasant			
and refreshing; maturity from middle to end of August.			
A certain crop may be had annually. Vine is free from			
all diseases and attacks of insects, and fruit has never been			
known to decay before maturity. It is wonderfully pro-			
lific, and is rapidly becoming popular as a very profitable			
wine grape. Makes a very good sweet wine resembling			
muscat, and when properly manipulated produces an excel-			
lent sparkling wine. 2 years	1 50	8 00	60 00
TENDERPULP. An improved seedling of the Flowers. Berries	1 00	0 00	00 00
large, very sweet and pulp quite tender. Ripens end of 15			
September. 2 years	1 50	8 00	60 00
THOMAS. Bunches from six to ten berries; berries slightly	1 00	0 00	00 00
oblong, large, of a slight violet color, quite transparent;			
pulp tender, sweet, of a peculiar vinous flavor, quality			
superior to any of the type. Maturity middle to end of			
August. Has but little musky aroma and makes a supe-			
rior red wine. A spurious variety is sold under the name			
of Thomas: this is inferior in quality, and produces a deep		,	
black colored fruit of no merit whatever. 2 years 10	1.50	8 00	60 00
Mack condict ituit of no ment whatever, 2 years	1 00	0 001	00 00

SECTION V.

HYBRID VARIETIES

Agawam (Rogers' No. 15.) Large, dark red. Each. 25c Per 12 25c Per 100 Allen's. Large, white, quality best. 25 25 Alvey. Medium, black. 25
Allen's. Large, white, quality best

Alvey. Medium, black. 25
RACCHIN (Rickett's) An improvement upon Clinton of which it is
BACCHUS (Rickett's.) An improvement upon Clinton, of which it is a seedling; promising as a red wine grape
a seedling; promising as a red wine grape
BERCKMANS. Parentage Clinton and Delaware; first fruited in
1870. Vine as vigorous as Clinton, which it much resembles.
Holds its foliage until frost. Bunch larger than Delaware, shoul-
dered, and not as compact as those of either parent; berry one-
third larger than Delaware, of same color; quality equal to that
favorite variety; maturity middle to end of July. Never has
mildewed in our grounds since we first fruited it in 1873. It has
the rare and desirable combination of the extreme vigor and fer-
tility of the Clinton with the excellence of the fruit of the Dela-
ware. Dr. Wylie always considered this variety as one of the
most promising of his seedlings. Vines have been growing and
fruited in several localities North and South, and it fully sustains
all what was expected from it
BLACK EAGLE. Very large, black, and of superior quality, suit-
able for amateur culture
Barry (Rogers' No. 43.) Bunch and berry large, good quality
Duchess. White, of good quality and growth
Early Dawn. Black, very good and early, moderate grower
El Dorado. Large, golden yellow, good, early

	To all	Dos	. 10	Dan	100
GETHE (Rogers' No. 1.) Bunch and berry large, greenish vellow,	Each.	Fel	14	rer	100
turning pink at full maturity, very sweet and of a well defined					
aroma. Ripens late	25c	\$1	50	\$8	00
Herbert (Rogers' No. 44.) Large, black, very good	25		00	4	
Irving. White, bunch very large, handsome and excellent where the					
locality and soil are suitable	25				
Iona. Berry and bunch large, pale red, of excellent quality; succeeds					
only in a few localities, and suited to amateur culture only	25				
Jefferson. Berries and bunch large, red, sweet, arometic, a promising					
new variety	50				
Lady Washington. Bunches very large, berries medium, pale amber,					
sweet, of good quality; a magnificent variety, but does not suc-					
ceed equally well in all soils; moderate grower	50				
Lindley, (Rogers' No. 9.) Large, red, very good	25				
Massassoit, (Rogers' No. 3.) Large, dark red, early	25				
Merrimack, (Rogers' No. 16.) Large, black, very good	25				
Mrs. McLure. A cross between Clinton and Peter Wylie; foliage					
and growth resembling the Clinton; bunch and berry medium,					
white, and of excellent quality	25	2	00	10	00
PETER WYLIE. This variety was obtained from following parent-					
age: Female, Halifax and Foreign; Male, Delaware and Foreign.					
Vine vigorous, short jointed, holds its foliage until fall. Bunches					
above medium, shouldered, loose; berries medium, round, white,			1		
transparent, golden yellow at maturity; flesh melting, very vinous					
and with a delicate muscat flavor; quality best. Ripens middle of			- 1		
July in average seasons. It has been tested for several years by a					
number of prominent fruit growers in nearly every section of the					a
South and in New York State, and after receiving their reports we					
have no hesitation in disseminating it. It is considered the best		0		05	00
flavored white grape so far tested South	50		50	25	00
Salem, (Rogers' 53.) Large, dark chestnut, sweet, very good	25	Z	00		
Senasqua. Large, blue black, excellent as a table grape, moderate	0=				
TRIUMPH, (Campbell.) Bunches and berries very large, white, vi-	25				
nous, excellent. A most showy variety, productive, and for the					
past five years free from rot	50	1	00		
Vergennes. A new light amber colored variety, early, good and	90	-1	00		
promising	50		- 1		
WALTER. Bunches large, berries medium, pale red, excellent, pro-	00				
lific and good grower. Ranks next to Delaware	25	2	00		
Wilder, (Rogers' No. 4.) Bunches and berries large, blue black, good	20	-	30		
quality, good grower	25	2	00		
1	200	-	00,		

FOREIGN VARIETIES.

Some of these will occasionally succeed in the open air, but this class is unreliable. To bring them to perfection vines must be planted and trained against a wall, or if on trellis, covered with a board coping.

Price, 1 year old, 25c.; \$2 per 12.

Black Hamburg. Large, black, an excellent variety, and very successful in sections of Florida.

White Sweetwater. (Chasselas Blanc.) Very good.

NUT BEARING TREES.

ALMONDS, Soft Shelled.

Price of Trees-1 year from bud, 4 to 5

feet, 25c. each; \$2.50 per 12.

Princesse and Sultana. Both are prolific and very good. These are the varieties mostly cultivated in Europe, and produce the bulk of the almonds of commerce.

CHESTNUTS.

American. 5 to 6 feet, 25c.; \$2.50 per 12; \$16 per 100.

Large Spanish. 2 to 3 feet, 25c.; \$2.50 per 12; \$16 per 100.

WALNUTS or MADEIRA NUTS.

Price of trees, unless specially noted, 2 to 3 feet, 25c.; \$2.50 per 12. 4 to 5 feet, 50c.; \$4.00 per 12.

Common. Nuts oval, free bearing after attaining 12 to 15 years of growth.

Chaberte. Nuts oval, large, late, very prolific.

Mayette. Nuts produced in pairs, oblong, somewhat flattened, best quality Præparturiensis or Early Bearing. Of

Preparturiensis or Early Bearing. Of dwarf growth, produces nuts when 4 years old. Nuts of good quality and size. 2 years old, 12 to 18 inches, 25c.; \$2.50 per 12. 3 and 4 years, 2 to 3 feet, 50c.; \$4 per 12.

Thin Shelled. Nut large, oblong, shell

very thin, of excellent quality, and keeps sweet a long time.

FILBERTS.

Price 25c.; \$2.50 per 12.

White Fruited, Purple Leaved, Bergeri, Cosford's Thin Shelled, Cut Leaved, Daviana, Eugenie, Garibaldi, Kentish Cob, Multiflorum, Princess Royal.

RASPBERRIES.

Cuthbert. After several years trial, this proves perhaps the best and most reliable of all the red fruited varieties; its introduction has made Raspberry culture quite profitable in sections of the Southern States where this product had been unreliable. Fruit red, large, of excellent quality, yield very prolific, ripens middle of May and continues for several weeks. Plants stand our driest summer to perfection. We have fruited a large number of

the newer varieties, such as HANSELL, LOST RUBIES, etc., side by side with Cuthbert, and while some of these are quite desirable, none surpass and few if any equal the Cuthbert in value for our climate. 50c. per 12; \$3 per 100; \$15 per 1000.

Gregg. The largest and so far the most desirable of the Black Cap tribe. 50c. per 12; \$3 per 100.

BLACKBERRIES.

Price 50c. per 12; \$3 per 100.

Kittatinny. Growth upright; berry large, sweet, good flavor, prolifie; ripens about June 10th.

Wilson's Early. Growth somewhat trailing; berry very large, sweet, very good; very prolific bearer; earliest, begins to ripen end of May.

ERYOBOTHRYA-Japan Medlars.

One year old plants (all pot grown,) \$1.50 per 12; \$10 per 100. Two years "25c. each; \$2.50 per 12; \$20 per 100.

The loss in transplanting open-ground grown plants is always large; this is trifling in using pot-grown plants.

This Fruit is well adapted to the coast belt, and is being cultivated there with profitable results.

ORANGES AND LEMONS.

All our plants are pot grown and grafted upon the Otahette and Limonium Trifoliatum, which dwarfs the tree in the same manner that the Paradise stock dwarfs the Apple. Dwarf Orange plants are better adapted for growing in conservatories, or in gardens where space is limited, than if grafted upon ordinary seedling stocks. This class of trees commends itself to amateurs. The fruit produced is the same as if grafted upon the common stock. Ten best varieties. Small trees 50c., larger \$1 each.

ORANGE, Chinese Dwarf or Otaheite. Suitable for stocks. Fine plants pot grown 25 and 50c. each; \$2 a \$3 for 12.

Limonium Trifoliatum, (Ægle Sepiaria.) A hardy species of lemon; leaves trifoliate, evergreen, of shrubby habit, thorny; fruit of the size of a pigeon egg, said to be, sweet and edible. Stands our coldest winters here and is desirable as a stock for dwarfing the various varieties of oranges. 50c. each; \$3.50 per doz.

POMEGRANATE.

Sweet. 25c. each; \$2 per 12.

Subacid. 25c. each; \$2 per 12.

MEDLAR, European.

Produces abundantly here: fruit dark brown, 2 inches in diameter. Must be allowed to ripen in the house, and is eaten when quite soft. 50c. each.

MULBERRIES, Everbearing.

Hicks. Wonderfully prolific, fruit sweet, insipid, excellent for poultry and hogs; fruit produced during four months. Each, 25c.; per 12, \$2.50; per 100, \$20.
Downing's. Fruit of a rich, sub-acid flavor; not as prolific as above. 25c. each; per 12, \$2.50; per 100, \$20.

Stubb's. A new variety, producing very large fruit of excellent quality. 25c. each.

JUJUBE (Zizyphus Sativa.)

A thorny shrub, producing fruit resembling the Date in appearance. Price, 25c. each; \$2 per 12.

ORNAMENTAL DEPARTMENT.

CLASS I.

DECIDUOUS SHRUBS.

List reduced to desirable varieties only.

Prices, except where noted, 25c.

12 shrubs in	twelve varieties,	our	selection,	**************************	\$2.
100 shrubs in	twenty-five to th	irty	varieties, our	selection	\$10.

ABELIA FLORIBUNDA.

Flowers pink in clusters.

ALTHEA FRUTEX-Rose of Sharon.

These are among our most desirable flowering shrubs, and deserve to be more extensively cultivated, as they produce their flowers in the greatest profusion during three months. The new European varieties lately introduced are nearly all of dwarf growth and their flowers are greatly superior to the old sorts. Their colors include white, pink, purple, blue, red, violet, mottled, etc. The following are the most striking out of our very large collection:

Amaranthus, Alba Serotina, Anemonæflora, Boule de Feu, Comte de Flandres, Comte de Hainaut, Carnea Plæna, Duc de Brabant, Grandiflora Superba, Lady Stanley, Leopoldii, Pompon Rouge, Pulcherrima Plæna, Puniceus, Pæoniflora, Parpurea Semiplena, Ranunculiflora, Rubra Plæna, Violacæa.

ALTHEA.

Mexicana Alba. Double, pure white, per 12, \$2.

Totus Albus. Very dwarf, pure white, single.

Buistii. With variegated leaves.

Variegata. Single, lilac, extra fine flower, leaves variegated.

AMYGDALUS.

Nana Fl. Pl. Rosea. (Double pink), dwarf almond.

Sinensis Alba. White, double flowering, Chinese Almond. An exquisite shrub, covered in early Spring with a profusion of snow white flowers. 50c.

BERBERIS-Berberry.

Aristata. Fruit bearing.
Purpurea. Leaves and fruit purple.

BUDLEYA.

Curviflora. Profuse blooming plant, flowers pale blue, in long pendant racemes. Lindleyana. Profuse flowering shrub, flowers dark blue, in long spikes.

CALYCANTHUS-Sweet Shrub.

Floridus Albus. A white flowering variety of the native species, fragrant and profuse bloomer.

Prœcox or Chimonanthus Fragrans. A Japanese variety, flowers yellowish white, very early in Spring.

CHILOPSIS LINEARIS.

Flowering Willow, a tall shrub from Texas, with very showy light pink flowers.

COLUTEA ARBORESCENS.

A tall growing shrub, very desirable.

CORONILLA EMERUS.

Scorpion Senna, pea-shaped flowers, yellow.

DAUBENTONIA.

Tripetiana. A leguminous shrub, flowers deep orange, spotted yellow, produced in clusters, blooms from May until Fall; very showy. Should be planted where somewhat protected from cold Winter winds. If killed by frost, it will usually grow off again in Spring and bloom profusely.

again in Spring and bloom profusely.

Magnifica, Punicea and Superbissima.

Are also showy varieties.

DEUITZIA.

Crenata Fl. Pl. Double flowering, an exceedingly handsome variety, flowers white tinged rose.

Crenata Fl. Pl. Alba. New, flowers pure white.

Graellis. Flowers pure white, bell-shaped, quite dwarf, is also valuable as a pot plant for Winter-blooming in conservatory.

Fortunii. Flowers white, single, profuse Spring bloomer.

DESMODIUM PENDULIFLORUM.

A new Japanese shrub, with drooping branches, and a profusion of purple flowers in Fall. Stems usually die every Winter, but a new growth is formed early in Spring.

ELEAGNUS ARGENTEA.

A tall growing shrub, with silvery leaves.

FORSYTHIA FORTUNII.

Fortunes. Growth upright, flowers bright vellow.

Viridissima. Flowers golden yellow; produced in greatest profusion early in March.

HYDRANGEA.

Well known and valuable shrubs. Thrive best if planted in partial shade and somewhat moist ground.

Japonica Corulea. Centre of flower heads deep blue, outer florets larger and of pale

Empress Eugenie. A new variety, white and blue.

Otaska. Flowers pink or blue, large heads. Paniculata Grandiflora. New Japanese; flowers in white trusses, very good.

Thomas Hogg. Produces immense umbells of pure white flowers. The finest of its class.

Stellata Prolifera. Centre of flower heads pink, outer florets larger and flesh color.

HYPERICUM-St. Johnsworth.

Low spreading shrubs, with bright yellow flowers.

Androsemum. Blooms early.

Patulum. Exceedingly prolific, produces large yellow flowers during the whole ·Summer.

Proliferum. Flowers from June to September.

INDIGOFERA DOSUA.

Low growing shrub, with pinnated leaves, flowers small, in purplish spikes.

LAGERSTREMIA - Crape Myrtle.

Indica Alba. White, a desirable novelty. New Crimson. Vivid Crimson.

LILAC.

See Syringa.

LONICERA BELGICA.

Belgian Honeysuckle, of bushy growth, flowers pink, profuse bloomer, excellent.

LYCIUM.

Barbarum. A shrub with slender branches and small purplish flowers. In Autumn it is covered with bright orange red berries. Chilense. Differs from above in stronger growth.

NANDINA DOMESTICA.

A Japanese shrub, with large panicles of white flowers. 50c.

PHILADELPHUS—Syringa or Mock Orange.

Grandiflorus. Flower very large, slightly fragrant.

Coronarius. White, fragrant. Fl Pl. With semi-double flowers.

POINCIANA GILLESSII.

Produces large heads of lemon colored flowers, with long scarlet stamens, free bloomer, grows 10 feet.

PRUNUS.

Triloba. With very double pink flowers, beautiful in early Spring.

Virgata. Flowers semi-double, beautifully formed and produced in great profusion, the earliest to bloom in Spring, of graceful growth. This variety is distinct from the variety cultivated as Virgata. Our plants came from Japan several years since. Fruit large, but owing to early blooming never perfects here, may prove of some value in Florida as a fruit tree. Grafted plants, 50c.

Pissardii. This is considered as the best of the hardy plants of late introduction. Tree of medium size, wood and leaves of intense purple. Fruit blackish purple, and said to be of good quality. troduced from Persia. Grafted trees, 30 cents.

PUNICA.

Granatum. Pomegranate.

Alba. Double white.

Rubra. Double red.

Legrelli or Variegata. Double flowering; variegated; very handsome.

Nana. Dwarf; single flowering.

PYRUS JAPONICA-Japan Quince.

Produces flowers early in Spring. Red.

Pink.

Nivea. A variety with snow white flowers, originated from seed in our grounds. 50c.

RHODOTYPUS KERRIOIDES.

A Japanese shrub, growing 6 to 10 feet, with single white flower. Profuse bloomer.

RHUS.

Cotinus. Venetian Sumac, or Smoke Tree. A tall growing shrub, producing curious hair-like flowers, resembling mist.

Osbeckii. A Japanese variety, with curiously winged leaves.

SPIRŒA.

Opulifolia Aurea. Golden leaved, very showy

Ariæfolia. Flowers white in May, a

beautiful variety.

Billardii. Large spikes of deep pink

flowers, profuse and perpetual bloomer. Callosa. Fortune's; flowers pink, in corymbs, ever-blooming.

Callosa Alba. Flowers white, ever-blooming, of dwarf growth, very neat and desirable.

Callosa Superba. Flowers pale flesh. Lindleyana. Delicately pinnated foliage, flowers white during Summer.

Prunifolia. Ladies' wreath; flowers small, pure white, very double, produced in great profusion upon long, slender branches; blooms very early in Spring.
Reevisii Fl. Pl. Reeves' double; large,

round clusters of double white flowers, covering the whole plant, one of the very

best, blooms in Spring.

SYMPHORICARPOS.

Glomerata. Indian current; red berries. Variegata. With variegated leaves. Racemosa. Snowberry; produces large white berries hanging on the plant throughout part of Winter.

SYRINGA-Lilac.

Common Purple. Common White.

Persica. Persian; foliage small, flowers purple, blooms in early Spring and Fall.

The following are among the most distinct of the European collections: Colmarensis, Gloire de Croncels, Gloire de Moulins, Gloire de la Rochelle, Josikea, Mme. Kreuter, Princess Marie, Rouge de Trianon, Rubra Insignis, Rubra Major, Ville de Troyes, Virginal.

TAMARIX.

Tall growing shrubs with slender branches and small delicate leaves, which resemble the cypress; flowers small pink, produced in great abundance.

Africana. Foliage light, glaucous green,

flowers pink in Summer.

Indica. With dark green foliage, and re-

sist best in a dry soil.

Plumosa, or Japonica. Of medium height, foliage very graceful and feathery; a fine new plant.

VIRGILIA LUTEA, or Cladrastis Tinctoria.

A native shrub, of tall growth, but quite rare; flowers white in panicled racemes, produced during May. \$1.

VIBURNUM-Snowball.

Opulus. Produces large globular clusters of white flowers.

Plicatum. New, of dwarf habit, flowers very large, white, with salmon-pink tint, foliage distinct, very desirable. 50c.

VITEX.

Agnus Castus Latifolia. Chaste or Sage Tree; grows twenty feet in height, forms a good shade tree. Flowers dark blue, in spikes, of a spicy aroma.

Incisa. Of more dwarfish habit, flowers

light blue.

WEIGELIA.

Amabilis. Of robust growth, dark pink, very profuse, blooms Spring and Fall.

Amabilis Alba. Flowers white, turn pink soon after opening.

Nivea. Rather dwarfish habit, flowers pure

white in spikes. Rosea. An exquisite Spring bloomer,

flowers in great profusion, pink.

Rosea Variegata. A variety of the preceding, with variegated foliage, dwarfish habit, and an exquisite bloomer.

Abel Carriere. Red.

Loogmansii Aurea. Leaves of a bright golden hue.

Dr. Baillon. Dark red.

Candida. Pure white, the best of this color.

Van Houttii. Red.

CLASS II.

DECIDUOUS TREES.

ACER-Maple.

Colchicum. Reddish wood. 50c. Silver. A desirable shade tree. 25 and 50c.

ACACIA NEMU-Japan Silk Tree.

A variety with red flowers, very showy and rare; grows twenty feet high. 50c.

CASTANEA—Chestnut.

European, fine tree for shade and fruit.

KOELREUTERIA PANICULATA.

Flowers yellow in June and July, rapid growth. 25c.

IDETIA POLYCARPA.

A new rapid growing tree from Northern Asia. Promises to become a valuable acquisition. 50c.

MAGNOLIAS.

Acuminata. Cucumber tree, of rapid growth and fine shape. 50c.

Conspicua or Yulan. Chinese White: flowers pure white. \$1.

Macrophylla.

Immense leaves, flowers white, fragrant. 50c. Purpurea. Chinese Purple; of bushy

growth, flowers purple. 50c. Soulangeana. Chinese Hybrid; flowers white and purple, very fine. 50c. All the Chinese varieties produce their flowers in early Spring, before the leaves appear.

Tripetela. Umbrella tree; leaves large,

flowers white. 50c.

PEACH.

Very ornamental, flowers very double. 25c. Double White.

Double Crimson.

Double Pink.

Pyramidal. Grows in a spiral form, as the Lombardy Poplar. 25c.

Weeping. With three feet bodies, a very handsome tree. 25c.

PAWLONIA IMPERIALIS.

A rapid growing tree with very large leaves, and in early Spring bears large panicles of light blue flowers, very fragrant; an excellent shade tree. 25 & 50c.

POPULUS AUREA.

Golden Leaf Poplar. 25c.

PYRUS SPECTABILIS .- Chinese Crab Apple.

A small size tree, producing double pink flowers.

SALIX-Willow.

Babylonica. Common weeping, a valuable tree. 25c.

Annularis or Ring Leaved. Of rapid growth, erect and with leaves singularly curled like a ring.

SALISBURIA ADIANTIFOLIA-Maiden Hair Tree.

A rapid growing tree with curious fan-like foliage.

STERCULIA PLATANIFOLIA—Japan Varnish.

A very desirable shade tree of rapid growth, bark very smooth, leaves large.

SOPHORA JAPONICA.

A medium size tree, with pinnated foliage. 25c.

TEXAS UMBRELLA TREE.

Melia Azedarach Umbraculiformis. A sub-variety of the China Tree. It assumes a dense spreading head, resembling a gigantic umbrella, and of unique appearance. 25c.

SECTION III.

BROAD LEAVED EVERGREEN SHRUBS AND TREES.

Price, except where noted, 50c.

12 plants, our selection of varieties......\$5.

With but few exceptions all the plants are grown in pots, thereby ensuring safety in transplanting, and enabling us to ship without danger of loss from removal.

ABELIA RUPESTRIS.

A small shrub, with numerous pale pink tubular flowers.

ARBUTUS UNEDO-Strawberry Tree.

Attains a height of 15 feet. Foliage dark glossy, flowers white, bell-shaped; early in Spring produces a bright scarlet edible fruit.

ARDISIA CRENATA.

A dwarf growing shrub, with dark shining leaves. Its beauty consists in a profusion of very showy berries, which are retained during Winter and until May. Succeeds best in a shady situation, near a building.

Is hardy here and Southward. Rubra. With red berries. Alba. With white berries.

AUCUBA-Gold Dust Tree.

This genus contains both male and female plants; if latter are planted near the male plants they produce a profusion of red berries, which make these varieties very attractive; succeed best in a shady situation.

Japonica (male). Leaves spotted yellow. Latimaculata (female). Leaves blotched vellow.

Longifolia (female). Leaves narrow, green. Picta (female). Leaves broadly variegated.

BERBERIS.

Fortunii. Fortune's Barberry, foliage long, flowers yellow, a low growing shrub.

Japonica. This splendid plant thrives best in a shady situation, as on the north side of a house, foliage very broad, with five pairs of leaflets, flowers yellow in long spikes during February and March, followed with dark purple berries; a magnificent shrub. 50c.; large plants, \$1.

Trifoliata. A native species of Southern Texas, leaves glossy, of medium height.

BUXUS—Tree Box.

25 to 50c. according to size.

Argentea. Silver-leaved.

Argentea Nova. Silver blotch-leaved.

Aurea. Golden-leaved.

Balearica. Very broad leaves. Communis. Common, one of the best for

hedges. \$10 and \$15 per 100. Eleta. Narrow-leaved.

Fortunii. Fortune's; round-leaved. Latifolia. Broad-leaved.

The tree box requires clay; they will not thrive in a sandy soil.

CEANOTHUS-New Jersey Tea.

Medium growing shrubs, with numerous panicles of small white, pale blue or rose colored flowers. Free bloomers during Summer. Plants all pot grown.

following new varieties in small pots at 50c each, viz:

Albert Pittet. Rose.

Americana Variegata. Leaves variegated. Arnouldi.

Gloire de Versailles. Azureous Grandiflorus. Bertinii.

Lucie Moser.

CLEYERA JAPONICA.

A shrub of medium height; foliage very glossy, flowers inconspicuous, berries red.

COTONEASTER.

Simonsii. Grows 4 to 6 feet high; foliage small, glossy; flowers white, followed by red berries which are retained during Winter. 25c.

Thymifolius. Low growing varieties of Wheelerii. trailing habit, desirable for rock work, slopes, etc.; produce a profu-

sion of red berries. 25c.

ELEAGNUS.

Reflexa. Rapid growing shrub, with long flexible branches, suitable for training in various shapes, as arbors, etc.; foliage glossy, flowers small, fragrant. 25c.

ERYOBOTHRYA JAPONICA—Japan Medlar or Loquat.

A highly ornamental tree, with broad leaves, blooms during February, seldom perfects fruit here, productive on the coast and in Florida. 25 and 50c.

ESCALLONIA.

Montevidensis. Profuse blooming shrub, flowers white in umbells.

EVONYMUS.

Japonicus. Japan, green; fine for hedges. 25c.; \$6 to \$10 per 100.

Variegata. Silver-leaved. 25c. Aureus. New golden from

Japan. 25c.

Aureus Nova. With golden bronze foliage, new, from Japan. 25c.

Duc d'Anjou. Leaves blotched vellow. 25c.

Pulchellus. Leaves narrow, of dwarf compact habit. 25c.

Radicans Variegata. Creeping Evonymus, with leaves finely variegated. 25c.

FABIANA IMBRICATA.

A heath-like shrub, bearing a profusion of white tubular flowers in May, 25c.

GARDENIA-Cape Jasmin.

Floridia. Flowers very large, white and very fragrant, foliage glossy. grown. 25c.

Fortunii. Flowers larger than Florida. 25c. Radicans. Dwarf, trailing, foliage smaller than above; flowers white, very fragrant. 25c.

Radicans Variegata. With variegated leaves. 25c.

Marginata. Very dwarf, leaves edged silver; suitable for bordering only. 25c.

Japonica. Similar to Florida, but with single flowers, which are succeeded with scarlet fruit, retained all Winter. 25c.

Variegata. A distinctly variegated variety, introduced from Japan by ourselves. 25c.

HELIANTHEMUM or CISTUS-Rock or Sun Rose.

Algarvense. A fine compact evergreen shrab, thriving in any soil. During May and June it produces a great profusion of large white flowers, with a dark purple spot upon each petal; one of the most showy and desirable shrubs we possess.

Albidus. With pink flowers. 25c Monspelliensis. With white flowers. 25c. With white flowers. 25c.

ILLICIUM ANISATUM—Anis Tree.

The leaves, when bruised, give a pungent anis odor; fine ornamental tree.

JASMINUM FRUCTICANS.

Large spreading shrub, with yellow flowers. 25c.

LAURUS-Laurel.

Nobilis. Apollo's or Spice Laurel; leaves very aromatic.

Regalis. Oreodaphne Californica, or California Laurel; leaves narrow, glossy, and with spicy fragrance.

Laurocerasus. English Laurel, a handsome and thrifty-growing shrub, with glossy foliage.

Lusitanica. Portugal Laurel, foliage glossy, flowers white in spikes.

Colchica, Caucasica, Rotundifolia. Beautiful sub-varieties of the English Laurel, all with glossy foliage.

Cameliæfolia. A new variety with recurved leaves.

Bertinii. A new variety with very large leaves.

LIGUSTRUM-Privet.

Amurense. From Amoor River, new, very rapid and quite compact grower, foliage small, a fine hedge plant. 25c.; 6\$ per 100

Californicum. From California, growth erect and rapid, foliage broad and glossy

green. 25c. Ibota. New Japan Privet, with glossy orange-like leaves. 25c.

Japonicum. Japan; fine shrub or low tree, foliage broad, panicles of white flowers, followed by purple berries. 25c.

Nepalensis. Nepaul; dwarf habit, leaves more oval than Japonica, panicles of white flowers, berries purple brown, long. 25c.

LIMONIA TRIFOLIATA.

A hardy variety of Lemon. [See under head of Miscellaneous Fruits. 50c.

MAGNOLIAS.

ALL POT GROWN.

Grandiflora. The king of the Southern broad-leaved evergreen trees, needs no description. 1 foot, 50c.; 2 feet, 75c.; 3

feet, \$1. Grandiflora Gloriosa. A variety of Grandiflora, with flowers of immense size, often 14 inches in diameter, foliage large and bronze underneath, a magnificent tree.

Grafted plants, \$1.50.

Fuscata. Banana Shrub; dwarf growing variety; in April and May it is covered with a profusion of small flowers, exhaling a most exquisite fragrance, similar to a ripe Banana, a great favorite. 8 to 10 inches, 25c.; larger plants, from 50c. to \$1.

Pumila. (Talauma Pumila) Chinese Dwarf, foliage long, growth dwarf, compact, flowers small, pure white with fleshy petals, exceedingly fragrant; produced in small quantity, but nearly through the whole year; thrives best in a partially shaded situation, and is also a good pot plant. Small plants, 50c.

MAHONIA.

Aquifolium. Holly-leaved ash barberry; a low growing shrub, leaves prickly, purplish in Autumn, flowers yellow in March. 25c.

MESPILUS.—Crategus.

Pyracantha Lalandii. A new sub-variety of the Evergreen Thorn, or Burning Bush. Its merit consists in producing more berries and latter of a brighter color than the old variety. 25c.

MYRTUS-Myrtle.

Medium sized shrubs, 25c.

Floreplenæ. Flowers double white.

Tomentosa. A pretty dwarf variety, with narrow leaves.

NERIUM-Oleander.

Small, in 2½ inch pots, 25c. each; \$2.25 per dozen. Larger, 50c. each; \$4 per dozen.

Double White. Flowers semi-double in young plants, becoming more double in proportion as plants grow older.

Joan of Arc. Semi-double white.

Lilian Henderson, Semi-double white, profuse bloomer.

Lutescens. Single, yellowish white.

Mme. Charles Baltet. Double corolla, cherry carmine.

Splendens. Old double pink, best of its color.

Single, deep crimson. Shaw's.

Souvenir de Claude Sahut. Carmine.

Neriums are sometimes injured by frost in this latitude and need some protection in severe cold weather.

QLEA FRAGRANS-Tea Olive.

One of our most desirable and popular shrubs; flowers white, small but of exquisite fragrance and blooms nearly all Winter. Several sizes, 25, 50 and 75c. and \$1 each.

Olea Illicifolia-Osmanthus Illicifolia. A new variety from Japan, with holly

like leaves.

PHOTINIA SERRULATA.

Dark glossy leaves, flowers white, in large heads, makes a showy, tall-growing shrub, or medium sized tree.

PITTOSPORUM TOBIRA.

A fine shrub, which is well adapted for trimming in fanciful shapes, flowers fragrant. I foot, 25c.; 2 to 3 feet, 50c.

Variegata. Variegated. Small plants, 25c.; larger, 50c.

RUSCUS ACULEATUS.

A dwarf evergreen, with acute or spiny leaves, and producing numerous red berries, which are retained during Winter.

SOPHORA SPECIOSA.

From Texas; flowers purple, fragrant; foliage glossy green, very distinct; grower.

THEA BOHEA-Chinese Tea Plant.

A beautiful shrub, with large white flowers and yellow anthers, giving it much resemblance to Single Camellia. 25c.

VIBURNUM.

Chinese, fragrant, fine Odoratissimum. broad leaves and compact shrub, flowers white.

Tinus Laurustinus. A popular flowering

shrub, blooms profusely.

Suspensum. Flowers creamy white, early

in Spring; of low growth.

Macrocephalum - Chinese Guelder Rose. Not a new shrub, but a very scarce one, and the handsomest of the genus. Flowers white in large heads resembling those of Hydrangea Thomas Hogg, but produced in early Spring. \$1.

AZALEA INDICA.

These beautiful early Spring flowering shrubs are perfectly hardy in this latitude; they succeed best in a shady situation and in a light soil, containing an abundance of leaf mould. Few plants are more desirable for the decoration of conservatories or for blooming in rooms. When pot grown plants are through their period of blooming, plunge the pots in the ground in a shady situation. The beauty of these plants is only realized when planted in masses in open ground.

PRICES OF PLANTS.

2 years, with flower buds, 25c.

3 and 4 years, very strong and well set with buds, 50c. to \$1 each. 12 Plants, our selection of varieties, 2 years, \$2.50; 3 and 4 years \$5.

Our collection consists of upwards of one hundred varieties, including all the distinct and leading kinds.

CAMELLIA JAPONICA.

This magnificent Shrub is perfectly hardy in this latitude. A partially shady situaation, especially where protected from cold winds during Winter, will give the best results. It is advisable to shelter the flower buds with a covering during very cold weather in Winter, otherwise they may not open well. A soil well mixed with leaf mould is the most desirable, and the best season for transplanting is October and November, and from middle of February to end of March. Our collection is very extensive, and plants are very vigorous and of compact growth.

PRICES OF PLANTS.

Double White, without flower buds, 12 inches, \$1.

Double White, with 2 to 4 flower buds, 12 inches, \$1.50.

Double White, without flower buds, 24 to 36 inches, \$2 to \$3.

Double White, with flower buds, 24 to 36 inches, \$2 to \$5. Colored Varieties, without flower buds, 12 inches, 75c. Colored Varieties, with flower buds, 12 inches, \$1.

Colored Varieties, without flower buds, 18 to 36 inches, \$1.50 to \$3.

We supply as follows, our selection of varieties:

12 fine plants, without flower buds, 12 to 15 inches, \$9.

Plants with flower buds are usually in stock until January 1st; after that date only a portion of the varieties can be supplied with buds.

We can always supply finer and larger plants without flower buds at lower rates than if set with latter. Again, for distant carriage there is more or less risk of losing the buds while in transit.

Adrian. Crimson. Alba Plæna. Double white, best of its Albertus. Rose, pink stripes. Alexina. Blush white, pink dots. Caleb Cope. Blush rose. Candidissima. Pure white, blooms late in Carswelliana. Red, striped white.

Chalmers Perfection. Pink. Chandlerii Elegans. Light rose. Colvillii Rubra. Red. Duchesse D'Orleans. White, striped pink.

Elata. Dark crimson.

Feastii. White and pink. Fimbriata. White, with fringed edge. Florida. Cherry red and white. Gillesii. Crimson, blotched white.

Gunellii. Rose.

Henri Favre. Rose salmon, white striped.

Imbricata. Deep carmine. Jeffersonii. Crimson.

Jenny Lind. White and pink. Lady Hume's Blush. Flesh color.

Landrethii. Clear rose. La Reine. White, striped red.

Marie Louise. Red and white.

Mrs. Abby Wilder. White, striped pink. Mrs. Cope. Blush, striped white.

Mrs. Luerman. Crimson, spotted white. Myrtifolia Alba. White, small foliage.

Pomponia Rubra. Dark red.

Palmer's Perfection. Red, striped white. Queen Victoria. Red and white.

Reine des Fleurs. Red.

Sacco. Bright rose.

Sarah Frost. Bright crimson.

Sherwoodii. Crimson. Wilderii. Delicate rose.

Wm. Penn. Cherry Red.

RHODODENDRONS.

Magnificent shrubs, with large clusters of flowers, resembling the Azalea. Perfectly hardy, but require a partially shaded situation, and a soil mixed with leaf mould.

Ponticum. Seedlings. These vary more or less in shade of color, and range from pink to purple. 3 years old, 50c. each, \$5 per 12; blooming size, \$1 each, \$9 per 12.

Hybrid Varieties of Catawbiensis. These are all grafted plants, which we import annually from Europe. These plants are

much superior to the seedlings in the size of clusters and the greater variety of colors, which range from pure white to pink, crimson and purple. 25 varieties. Price of grafted plants, 2 and 3 years, with flower buds, \$1.50 to \$2 each; \$15 to \$20 per 12.

CLIMBERS.

Price, except where noted, 25c. each. 12 Varieties, our selection, \$2.

ABUTILON VEXILLARUM.

A good climber, flowers red and vellow, profuse bloomer and quite hardy.

QUINNATA-Five Leaved AKEBIA Akebia.

A Japanese climber, with reddish brown flowers.

AMPELOPSIS JAPONICA-Japan Ivy.

Beautiful deciduous climber of very rapid growth, eminently suitable for covering brick walls, stumps, etc.

BIGNONIA GRANDIFLORA - Japan Trumpet Vine.

Superb climber, flowers very showy.

HEDERA-Ivy.

Algeriensis. African. Hibernica. Irish.

JASMINUM.

Nudiflorum. Produces light yellow flowers in early Spring. Flowers white, fragrant. Officinalis.

JASMINE DOUBLE CAROLINA Gelseminum.

We received this plant nearly 18 years ago, from near Columbus, Ga., where it was found growing in the woods. It was described in our Catalogue of 1872, but stock being accidentally destroyed, no plants were sent out since that year. As a greenhouse plant we find it very desirable, being a very free bloomer, flowers very fragrant and very double. It lasts longer than the single flowering variety. A friend residing near New York, to whom we gave a plant of the original stock, reported that it bloomed occasionally through the whole Summer. 25c.

LONICERA-Honeysuckle.

Aurea Reticulata. Golden netted, a re-markable variety; leaves bright green, beautifully netted all over with golden veins, leaves and stems, changing to bright crimson in the Autumn; a beautiful plant.

Belgicum. Belgian; pink flowers, very sweet, profuse bloomer, one of the best. Coccinea Brownii. Scarlet, trumpet.

Grata. Yellow trumpet.
Sinensis. White, fragrant, evergreen.

MATSEA GLABRA or Manettia.

A rapid growing climber, with scarlet tubular flowers, produced in great profusion; the stems are killed every Winter; the roots require a covering of leaves in Winter.

MAXIMOVICZIA SINENSIS.

A deciduous climber, with small whitish fragrant flowers, succeeded by red berries which are retained during Winter.

PASSIFLORA.

Arc-en-Ciel. Flowers large, centre white and citron colored, with outer circle dark; a rapid grower. New; an excellent plant.

PERIPLOCA GRECA-Grecian Silk Vine.

Rapid grower, flowers purple.

RHYNCOSPERMUM JASMINOIDES.

Evergreen, with white fragrant flowers in April and May; excellent for training against a wall.

Variegata. With variegated leaves.

ROSES.

Several varieties of Noisette. 25c.

SOLANUM JASMINOIDES—Potato Vine

Evergreen.

Variegata. Variegated.

WISTARIA.

Sinensis Purpurea. A beautiful climber, producing in early Spring large clusters of purple pea-shaped flowers, a vigorous grower.

Frutescens Magnifica. Flowers in long tassels, pale blue, blooming later than the Chinese varieties, and also producing flowers during the Summer; extremely vigorous.

Sinensis Alba. A white flowered variety, beautiful. 50c.

ORNAMENTAL HEDGE PLANTS.

CAPE JASMINE.

Six inches, pot grown, \$10 per 100.

EVONYMUS JAPONICA.

Twelve inches, \$10 per 100; \$75 per 1,000. Six to eight inches, \$5 per 100; \$40 per

LIGUSTRUM AMURENSE.

One year, fine plants, \$6 per 100.

THEA BOHEA.

From 3 inch pots, \$10 per 100.

ORNAMENTAL GRASSES.

ALL HARDY IN THIS LATITUDE.

GYNERIUM ARGENTEUM — Pampas Grass.

A most ornamental plant, with silvery plume-like spikes of flowers, very hardy and thrives in any ordinary rich soil. 25c.; large plants, 50c.

ERIANTHUS RAVENNÆ.

Attains a height of ten to twelve feet, throwing up numerous flower spikes. Flower spikes grayish white; blooms profusely, and remains in bloom a long time; needs space to show its merits. 25c.

EULALIA JAPONICA.

A new variegated hardy grass from Japan.

In appearance it somewhat resembles the ribbon grass while in a young state. It forms compact clumps of six feet in diame er. Its flower stalks are very graceful and numerous, and, after several years trial in our grounds, we highly commend it as a very desirable ornamental grass. 25c.

EULALIA JAPONICA ZEBRINA.

Similar in habit to above, but with its leaves blotched with gold. The stripe, instead of running longitudinally like in the former, run across the leaf. Price 2ēc.

CONIFEROUS—Evergreens.

Our stock of plants of this section is very large and of the finest quality. They are grown in pots during a part of the season, and being sent out with all their roots in a compact ball of earth, there is no danger of loss in transplanting.

We would again urge the necessity of planting small, healthy pot-grown plants in preference to larger specimens, which can only be furnished from open ground, and with these there is always connected some risk in transplanting. We append the height the different varieties may be expected to attain.

Price for plants grown in 4 and 6 inch pots, unless noted,......50 cents. Larger specimens, from 8 and 10 inch pots......\$1 to \$3 each.

ARAUCARIA IMBRICATA—Chili Pine.

A most remarkable variety, leaves stiff and sharp pointed, moderate grower. \$1 to \$3. 25 feet.

BIOTA-Arbor Vite.

Asiatic section.

Aurea. Golden; a beautiful compact tree of golden hue, most desirable. 12 inches, 50c.; $1\frac{1}{2}$ to 2 feet, \$1. 8 to 10 feet. Filiformis Pendula. Weeping, thread-

like foliage, very curious. 6 to 8 feet.

Intermedia. Seedling of Aurea; compact, with habit of Golden and Chinese; from open ground. 25 to 50c. 8 to 10 feet.

Meldensis. Ashy foliage, rapid grower and distinct. 15 feet.

Semper Aurea. A beautiful new variety, still finer than Elegantissima; it retains its bright golden hue longer. 50 and 75c. 6 to 8 feet.

CEDEUS ARGENTEA—African Cedar.

Thrives well and forms a fine tree, 25 to 30 feet.

CEDRUS DEODORA-The Great Cedar of the Himalayan Mountains.

A magnificent tree, succeeding admirably here. 1 foot, 50c.; 2 feet, \$1; larger sizes in proportion. 50 to 75 feet.

CEPHALOTAXUS FORTUNII-Fortune's Yew.

Broad leaved, moderate grower. 10 to 12 feet.

CHAMŒCYPARIS VARIEGATA -- Variegated Cypress.

6 to 8 feet.

CRYPTOMERIA.

Japonica. Japan Cedar; a rapid growing tree of graceful habit. 25 feet.

Arancarioides, New varieties. Spiralis Imbricata,

CUNNINGHAMIA SINENSIS—Chinese Pine.

A tree somewhat like the Araucaria, with lance leaves and horizontal branches, rapid grower and very beautiful. 75 feet.

CUPRESSUS The Cypress.

Australis. Of rapid growth and quite

compact. (See Frenela.)

A fine tree with dense com-Benthami. pact head and long slender branches. 25 to 35 feet.

Cashmeriensis. Bluish cast, rapid grower.

40 to 60 feet.

Cornevana. Compact growth, glaucous hue. 15 to 20 feet.

Ericoides. Heath leaved; very compact, of moderate height, foliage quite distinct, turns purple in Winter.

Funebris. Funeral, rapid growth and

graceful habit. 50 feet

Glandulosa or McNabiana. Thrifty grower, foliage green, and bark of branches red. Attains a height of 50 feet.

Gracilis. Ashy green foliage, delicate and graceful habit.

Goveniana. Of rapid open growth, foliage dark green. 50 feet.

Hugelii. A rare species, of erect and rapid growth.

Knighteana Elegans. Foliage of glaucous hue, exceedingly graceful and of

rapid growth. 30 to 50 feet.

Lawsoniana. Fine compact habit, foliage feathery, varies from a vivid green to a silvery tint, according to sub-varieties. It sports from seed. 10 to 20 feet.

Lusitanica, or Sinensis Pendula. Cypress of Goa, a graceful variety of glaucous green and with pendant branches. 20 feet.

Macrocarpa, or Lambertina. A rapid open grower, foliage bright green. 30 to 50 feet.

Majestica. Foliage ashy green, of rapid growth, branches somewhat pendule us. Majestica Viridis. Similar to the above,

but with dark bright green foliage. Nutkaensis — Thujopsis Borealis. Nootka Sound Cypress, of dwarf compact habit. 6 to 8 feet.

Nepalensis Pendula. A sub-variety of Cupressus Lusitanica.

Sempervirens Horizontalis. Rapid grower, branches spreading. 50 to 60 feet.

Sempervirens Pyramidalis. Oriental or Pyramidal Cypress, of very compact and shaft-like habit. We can furnish this variety in large quantities and of various sizes, from 25c. to \$2 each.

Thurifera. Of large size and spreading habit, foliage glaucous green. 50 feet.

Torulosa, or Twisted Cypress. A rapid grower, of glaucous liabit. 30 to 40 feet.

CALLITRIS QUADRIVALVIS - Thuya Articulata, or African Arbor Vitæ.

A medium sized tree, with foliage of a yellow cast.

FRENELA.

New Holland species, with delicate threadlike foliage, of graceful shape and appearance, rapid growers, but liable to be injured by Spring frosts while young. Must be planted where they can be sheltered from cold winds. Several varieties, viv: Gunnii, Australis, Machrastachya, &c.

JUNIPERUS-The Juniper Tree.

Communis. Common English.

Communis Hibernica. Irish; fine pyramidal growth. 8 to 10 feer.

Communis Pendula. English weeping. 15 feet.

Communis Suecica. Swedish; yellowish cast. 10 feet.

Japonica. Japanese; bright green, very good. 8 to 10 feet.

Oblonga. Nepaul; of spreading habit. 10 to 15 feet.

Oblonga Pendula. Nepaul Weeping; the finest of its class. 20 feet. 1 foot, grafted, \$1.

Repens. Creeping; quite unique variety; thrives in any soil.

Sabina. Savin; male and female, a low

spreading dark-leaved shrub.

quamata. Scaly; a trailing shrub of great beauty, and the finest of the trail-Squamata. ing section.

LIBOCEDRUS DECURRENS—California Arbor Vitæ.

A magnificent and rapid growing tree, foliage in form of fans. 50 to 85 feet. 50c. to \$1.

LIBOCEDRUS CHILIENSIS — Chilian Arbor Vitæ.

Delicate foliage, silver striped. 6 to 8 feet.

PODOCARPUS JAPONICA -Japan Yew.

A medium sized tree of compact and rather bushy habit, leaves broad, dark green. 10 to 15 feet.

-PODOCARPUS CORONARIUS.

Dwarf habit, grows erect.

PODOCARPUS NAJII.

With very broad leaves. Not hardy North of Augusta.

RETINOSPORA—Japan Cypress.

A new and valuable genus of small trees or shrubs from Japan, very hardy and desirable.

Filifera. Of medium height, branches very slender and thread-like.

Obtusa. Leaves glossy green above, with silvery stripes beneath.

Pisifera, or Pea Fruited. Dwarf growth, with slender branches and sharp pointed glaucous leaves.

Pisifera Aurea. Golden, with the tips of the branches of a bright golden hue, beautiful. 50c. to \$2.

Pisifera Argentea. With foliage partly

silvery white, beautiful. \$1. Plumosa, or Plume Like. A rapid growing variety, with exquisite foliage and slender branches, very handsome. 50c. to \$2.

Squarrosa. Rapid grower, foliage light bluish green, very handsome, one of the best of the genus. 50c. to \$2.

TAXUS—The Yew.

Few varieties of this genus are desirable here, growth very slow.

Stricta. Of upright growth, but with slender branches and of open habit.

THUJOPSIS-Japan Arbor Vitæ.

Dolabrata. Axe-leaved; branches drooping, dark green leaves, of dwarf growth. Dolabrata Variegata. Similar in habit to above, but with silver striped foliage; both thrive best in partial shade.

THUYA-Arbor Vitæ.

A merican section.

Ericoides. With heath-like foliage, very

compact. cumila. Booth's; Very dwarf, of dense Pamila. rounded growth, very distinct.

Gigantea. Nutall's; rapid growth and distinct, scarce.

Lobbii. Lobb's, from California; resembles Gigantea, but more compact, and not as rapid grower.

Dwarf, from Nootka Sound; Plicata. compact growth.

Tom Thumb. A dwarf variety, of slow growth and compact habit.

ROSES.

UR collection of this truly Queen of Flowers is very select. We have for years past made the growing of Roses on a large scale one of the main features of our establishment, and annually added every good new Rose to our collection; proving their qualities before sending them out, so that our customers can rely fully upon our selection. We have within the past twenty-five years tested the relative merits of upwards of one thousand varieties, and those in the following list are the cream of their several classes.

The stock of plants number many thousands; still growing so many varieties, it is impossible for us to keep constantly a large stock of each enumerated kind; we therefore beg persons sending their orders to allow us some latitude in the selection, or send an additional list to select from, in case those first named should be exhausted.

Our Roses are cultivated upon their own roots, excepting a very few varieties of great beauty of flower, but of such dwarf growth as to prevent their propagation unless budded upon strong growing stocks. These varieties are placed in a separate class, and

they require some care in removing suckers, should any appear.

A deep soil well fertilized with stable manure is the most favorable to the Rose. In planting, select two or three of the strongest branches, cut these back to two or three einches each and remove all the smaller ones. Each new shoot will produce finer flowers than if the old wood is left. After the first killing frost, prune back the bush to three or four inches above ground; repeat this annually, and a regular crop of fine flowers will be secured.

Avoid crowding the bush with numberless small branches; no good flowers must be

expected unless the plants are annually pruned.

The plants which we send out are grown in open ground, are very strong and healthy. The usual average height of Hybrids is four feet, and many varieties attain six feet in height. Plants are cut back eighteen inches or two feet to reduce bulk in packing. We have had for upwards of twenty-five years the reputation of growing the strongest plants offered in market, and we wish it distinctly understood that we do not enter into competition with growers who offer plants at less than half our rates. We desire a comparison of our plants and prices with the low priced collections offered by some growers, and we feel assured that the advantage will be vastly in our favor.

All Roses are ever blooming, except those specially noted at the end of the list,

GENERAL COLLECTION.

PRICES.

Purchasers' selection, 25c. each; \$3 per dozen. Our selection of varieties, \$2.50 per dozen, all distinct. Our selection of varieties, \$15 per hundred, all distinct.

SECTION I.

CHINA ROSES.

The Roses belonging to this class are among the best bloomers for this climate. Their flowers are produced in great abundance, though not equal in beauty of shape or variety of color to other classes.

Archiduc Charles. Variable, light pink Lawrenciana Virdis. Green Rose. to deep crimson.

Cammellioflora. Rosy purple. Ducher. White, free bloomer.

Eugene De Beauharnais. Crimson, light centre.

Louis Phillippe. Dark crimson spotted. Purple Superior, or Agricpina. Dark crimson.

Theresa Stravius. White, pale flesh centre.

SECTION II.

TEA ROSES.

Roses belonging to this class are generally of a delicate structure with slender branches, of light shades, very fragrant, monthly bloomers, valuable for this climate.

Aline Sisley. Deep carmine red.

Aristides. White, buff centre.
A Bouquet. Pink, mottled vermillion, coppery hue, dwarf.

Azelie Imbert, or Perfection de Montplaisir. Canary yellow.

Archimede. Rosv fawn, darker centre. Anna Olivier. Blush.

Andre Schwartz. Crimson, variable in color.

Adrienne Christophe. Coppery and apricot, shaded rose.

Amabilis. White apricot centre.

Alphonse Karr. Deep rose. Bremond. Rosy crimson.

Belle Fleur D'Anjon. White, with pink

Bon Silene. Rosy carmine, shaded salmon, fine in bud.

Bougere. Rosy bronze.

Catherine Mermet. Silvery rose, large.

Clothilde. Deep rose.

Cornelia Cook. White, dwarf, growth; fine in bud, an old sort.

Comtesse Riza Du Parc. Coppery, shaded carmine.

Chamois. Buff centre, lighter edge.

Claire Carnot. Pale orange yellow centre, lighter edge.

Comtesse de Sembui. Rosy salmon.

Coquette de Lyon. Pale yellow, free

Devoniensis. White creamy centre. Duchesse de Brabant-Comtesse de La-

Salmon pink.

barthe. Salmon pink.
Duchesse D'Orleans. White, yellowish

Duchess of Edinburgh. Dark crimson, not very double and of slow growth on

Enfant de Lyon. White, pink centre.

Etoile de Lyon. Large, full, canary yellow. Gigantesque. White, pink centre.

Cloire de Rosamont. White, buff centre.

Gloire de Dijou. Salmon shaded buff. Goubault. Rose, with buff centre.

Homer. Rose, salmon centre.

Isabella Sprunt. Resembles Soft ano, but more vigorous and of lighter color.

La Sylphide-Mme. Ristori. White, with creamy centre.

Le Pactole. An old but still desirable kind, white, vellow centre.

Louis Richard. Coppery rose, deeper

Louis Gigot. White, salmon centre.

La Princesse Vera. Flesh edged copperv rose.

MM. Bravy-Alba Rosea, Mmc. Sertot. White, pink centre.

Mme. Cecile Berthod. Sulphur yellow. Mme. Caroline Kuster. White, orange

yellow centre.

Mme. Damaizin. Salmon. Mme. Falcot. Apricot yellow.

Mme. Margattin Lemon yellow, with peach-colored centre.

Mme. Furnido. Pink centre, lighter edge. Mme. Louville. Deep rose.

Mme. Cusin. Coppery rose. Mme. Camille. Rosy salmon, large. Mme. H. Jamain. White, lemon centre.

Mme. Lombard. Salmon pink, shaded

deep rose.

Mme. Joseph Schwartz. White tinged flesh.

Mme. Caro. Salmon pink.

Mme. Trifle. Salmon yellow, half climber. Mme. Welch. White edge, centre orange

vellow. Marie Ducher. Light pink, shaded salmon.

Marie Guillot. Pure white, dwarf.

Marie Sisley. Yellowish white.

Marie Vanhoutte. Light yellow, outer

petals tinged pink.

Marechal Niel. Deep canary yellow, large and full, a free bloomer and of climbing growth; grows best if budded on strong stocks.

Marechal Robert. Pale lemon, shaded buff.

Mathilde Lenderts. Bright rose.

Nyphitos. Pure white, fine in bud, but a bad grower.

Perle des Jardins. Yellow, very hand-

Perle de Lyon. Dark yellow. Princesse Marie. Pink.

Rubens. White, flesh centre.

Reine de Portugal. Yellowish, mottled

pink, coppery hue. Reine Maria Pia. Deep rose, crimson

edge.

Soffrano. Buff.

Sombreuil. White, flesh centre.

Scuvenir de Paul Neyron. Pale yellow. Triomphe du Luxembourg. Rosy car-

mine, coppery tint.

Vicomtesse de Cazes. White, yellowish centre.

Zelia Pradel. White with a yellowish centre, half climbing habit. Best of its class.

SECTION III.

HYBRID TEA.

This class is of recent origin. They were produced from crossing Tea with Hybrid perpetual Roses, and while a few denote well defined traits of both races, others seem to be pure Teas. Many are of very weak growth and bad color, hence we have rejected the greater number as undesirable. The following are valuable:

Cannes la Coquette. Light flesh, shaded salmon.

Captain Christie. Flesh, with deeper centre free bloomer, fine flower, dwarf,

Cheshunt Hybrid. Cherry carmine, shaded violet, of vigorous growth and free Spring bloomer.

Hon. George Bancroft. Violet red. Jules Finger. Flesh, deeper centre, thorn-less, in the style of Captain Christie. La France. Delicate silvery rose, superb flower and free bloomer, but of weak constitution and apt to die back; always scarce on own roots.

Mme. Alexandre Bernaix. Deep rose, shaded crimson, a fine flower; plants on own roots are of little value.

Mme. Alfred Carriere. Pure white. sometimes slightly tinged flesh, very free and constant bloomer and vigorous grower.

SECTION IV.

BOURBON ROSES.

Roses belonging to this class are generally of a vigorous dwarf habit, branches short and thick, and mostly with one flower; when a branch outgrows the others it often bears a corymb, or a panicle of flowers. Free bloomers, all colors, white less frequent.

Comice de Tarn-et Garonne. Carmine red. Gloire de France. Pink.

Hermosa. Pale pink.

Imperatrice Eugenie. Large, very full, beautifully cupped, extra good flower. Louise Margottin. delicate rose, an

Bright rosy pink cupped.

Madame de Stella. Delicate pink, very

Monsieur Jard. Large, imbricated, cher-

Reine Victoria. Beautiful pink.

Sir Joseph Paxton. Bright cherry red. Souvenir de la Malmaison. Large, very full, magnificent.

SECTION V.

NOISETTE AND OTHER PERPETUAL CLIMBERS.

Climbing Devoniensis (Tea). White, creamy centre.

Chromatella or Cloth of Gold. large, chrome yellow. Best budded upon Manetti, when flowers are always darker than upon plants on own roots.

James Sprunt. A climbing China; dark

Jules Jurgensen. Magenta, centre shaded violet.

Lamarque. White.

Madame Massot. Light pink.

Octavie. Deep crimson.

Reve D'Or or Climbing Soffrano. Deep coppery yellow.

Solfatare. Deep yellow, free bloomer. Surprise. Buff or light coppery.

Unique Jaune. Coppery yellow, half double.

Vicomtesse D'Avesnes. Pink.

Wm. Allen Richardson. Orange yellow,

centre coppery yellow.
Woodland Margaret. White, vigorous. Reine Marie Henriette. Clear cherry red.

SECTION VI.

Noisette. Dwarf Varieties.

White, flesh colored | Celine Forestier. Coquette des Alpes. centre, free bloomer.

White, with yellow and lilac centre. White Cluster. White, profuse bloomer.

SECTION VII.

HYBRID REMONTANT ROSES.

This class comprises the most perfect forms and colors. They are nearly all of vigorous growth. Some varieties bloom only during Spring and again in Fall, with an intermission of two months; others are as free bloomers as Tea Roses. First class varieties only are here described.

Adam Paul. Light red. Achille Gonod. Lilac rose.

Antoine Mouton. Bright rose.

Ardoisee de Lyon. Fiery red, slate col-

ored edge. Auguste Mie. Delicate pink. Aurore Boreale. Fiery re

Fiery red, mottled blackish carmine. Baronne Haussman. Purplish red.

Baronne Prevest. Deep rose.
Bessie Johnson. Light blush.
Berthe Leveque. Flesh white edge.

Belle Normande. Lilac pink. Blanche de Meru. Light flesh. Beieldieu. Bright cherry red.

Cardinal Patrizzi. Deep purplish red. Camille Bernadin. Vivid red, very good.

Claude Millon. Dark red, velvety. Charles Lefebvre. Dark cherry carmine.

Countess of Roseberry. Carmine rose, good form.

Dr. Hogg. Deep violet red.

Dr. Hooker. Crimson scarlet, shaded violet.

Dr. Sewell. Crimson scarlet, shaded purple, free bloomer.

Duc de Cazes. Purplish red, shaded violet, dwarf growth.

Duke of Connaught, Deep crimson, velvety, dwarf, not a free bloomer.

Duhamel Dumonceau. Brilliant red, shaded violet, free bloomer.

Edward Jesse. Deep pink.

Emily Laxton. Cherry rose, good bud, free bloomer.

Empereur de Maroc. Dark crimson, shaded darker purple.

Exposition de Brie. Brilliant scarlet. Fanny Petzold. Clear satin rose.

Felix Genero. Cherry red, globular. Gen. Jacqueminot. Fiery red, an old

standard sort. Gen. Washington. Brilliant vermillion.

Henry IV. Deep red. Jean Touvais. Deep red.

John Hopper. Brilliant pink. John Nesmith. Brilliant deep red.

Joseph Vernet. Brilliant pink. La Reine. Deep rosy lilac, a standard old

La Rosiere. Fiery crimson, velvety. Lord Raglan. Deep crimson, shaded purple.

L'Oriflamme de St. Louis. Dazzling red carmine.

Mme. Charles Wood. Dark lilac carmine. Mme. Catherine Souppert. Flesh, bordered and shaded rose.

Mme. Auguste Van Geert. Light pink. Mme. Moreau. Deep brilliant carmine, perpetual bloomer and best of its color.

Mme. Recamier. Delicate rose. Mme. Martin de Besse. Pale flesh. Mme. Prosper Langier. Bright pink. Mme. Schmidt. Very large, deep pink. M'lle Annie Wood. Deep carmine red. M'lle Leonide Leroy. White. Marechal Canrobert. Bright pink.

Marechal Suchet (Damaizin). Deep carmine pink

Magna Charta. Bright pink.

Marchioness of Exeter. Clear rose, tinted cherry rose.

Paul Neyron. Deep pink, very large. Perle des Blanches. Pure white; synonym Boule de Neige, free bloomer. Pœonia. Crimson red.

Pierre Setelzki. Purple red. President Grevy. Purple red.

President. Deep purple crimson, shaded

Panachee D'Orleans. Pink, with darker

Prince Albert. Deep crimson.

Prince Camille de Rohan. Very dark brownish crimson.

Princess Mathilde. Dark crimson, shaded purple.

Princess of Wales. Light vermillion. Princess Louise Victoria. Deep carmine, changing lighter, climbing.

Queen of Waltham. Cherry rose.

Rev. J. B. M. Camm. Bright rosy pink.

Raphael. Dark red. Sappho. White tinged pink.

Sidonie. Light pink.

Sir Garnet Wolseley. Vermillion, shaded carmine.

Souvenir de Charles Montault. crimson, shaded purple.

Souvenir de William Wood. Dark purplish crimson, shaded dark violet. Triomphe D'Amiens. Deep red carmine,

shaded darker carmine. Wm. Paul. Deep crimson, very dwarf. Yolande D'Arragon. Pale pink.

SECTION VIII.

ROSA POLYANTHA.

The varieties of this class, which have only been introduced within a few years, are crosses between the Japan type and Teas. They are ever-blooming, producing a profusion of clusters, very small, but very double flowers. Growth slender, dwarf, very desirable.

Cecile Brunner. Flowers one and a half inch in diameter, salmon pink, deeper centre, beautifully formed and fragrant. Mignonette. Delicate rose, changing to blush, flowers very small.

Paquerette. Pure white, flowers very · small. These two last varieties are exquisite miniature roses.

SECTION IX.

MOSS ROSES.

SPRING BLOOMERS, UNLESS NOTED.

Alfred de Dalmas. Rose, lighter edge, perpetual. Adolphe Brogniard. Pink. Berangere. Rose carmine.
Eugene de Savoie. Pink.
Deuil de Paul Fontaine. Deep purple perpetual.

Eugene Verdier. Crimson, perpetual. Glory of Moss. Light pink, compact habit. Mme. Moreau. Bright pink. Perpetual White. Pure white.
Precoce. Dark red.
Zobeide. Pink.

SECTION X.

MISCELLANEOUS ROSES.

SPRING BLOOMERS.

Banksia Alba. White Banksia; flowers small in clusters, climbers. Banksia Lutea. Yellow Banksia; flowers small in clusters.

Banksia Fortunii. White, flowers larger than B. Alba.

Persian Yellow. Very double, of intense chrome yellow; plants are all budded, as it is of no value on its own roots. 35c.

SECTION XI.

BUDDED ROSES.

This section comprises varieties which give unsatisfactory results if grown upon their own roots. Some varieties do not propagate rom cuttings and can only be increased by budding; others introduced within the past nonths only cannot be offered upon their own roots until another year elapses.

The objection to Budded Roses by may persons is on account of the suckers they sometimes throw out. This is readily avoided if they are planted sufficiently deep to place the junction of the bud with the stock from two to three inches below the surface of the earth.

Plants are all budded upon Manetti stocks. Price, 35c each, unless priced.

Baroness Rothschild (H. P.) Large pink, perfect form.

Cloth of Gold (N.) Deep chrome yellow. Dr. Henon (H. P.) Pure white, fine form. Eliza Boele (H. P.) White, dwarf, fine

form, good bloomer. Henri Schultheis (H. P. 1883.) Delicate pinkish rose, fine form.

Mabel Morrison. White, sometimes tinted blush, good form.

Marechal Niel (T.) Deep chrome yellow, climber

Merveille de Lyon (H. P. 1883.) Resembles Baroness Rothschild in form, but pure white; claimed to be the best white Hybrid rose yet known. \$1. Queen of Bedders (B.) Dark crimson.

White Baroness Rothschild. white sport of Baroness Rothschild. \$1.

GREENHOUSE DEPARTMENT.

HIS branch of our establishment is now the largest and most complete in the South. For this department a special Catalogue (No. 2) is published on the 1st of February of each year. The increasing demand for Greenhouse Plants has enabled us to keep up with the march of progress, and induced us to cultivate a very large and varied stock of Plants, not only of the favorite classes usually found in greenhouses, but also Plants of the newest introduction. Our facilities for propagating large quantities of healthy stock, and the saving of fuel, enable us to offer Plants at unusually low prices.

Special attention is called to our very large stock of Winter blooming plants such as Abutilons, Begonias, Bouvardia, Cestrum, Chorozema, Daphne, Eupatorium, Euphorbia, Libonia, Stevia, etc. Many classes of Bedding Plants succeed best when planted out in the Fall.

CHRYSANTHEMUMS-50 varieties, pompone, large and Japanese. \$1 per dozen. PENSTEMON-\$1 per dozen. PHLOX-\$1 per dozen.

SPECIAL COLLECTIONS OF PLANTS FOR WINTER BLOOMING.

Many persons unacquainted with the most desirable classes of plants often find some difficulty in making suitable selections. To prevent disappointment when plants are selected injudiciously, we would suggest to our patrons to order special collections, stating whether they are required for Greenhouse culture, Winter blooming, or for Summer decorations of flower gardens. These collections are composed of the most desirable classes, and of such as we grow in large quantities. In making these collections we guarantee that they will give satisfaction, and the utmost liberality will be observed in the quantity sent.

FLOWER POTS.

We have constant applications from our customers for the address of reliable Flower Pot manufacturers. We take pleasure in stating that Messrs. A. H. HEWS & CO., North Cambridge, Mass., have supplied us for years with an unusually good quality. For shape and finish they are unsurpassed. Their prices are very low, and their manner of packing being very safe, allows their wares to be received in excellent condition and at a very small advance upon cost at factory. We herewith append a list of their prices for the sizes usually in demand All goods packed in barrels and delivered in Boston at card prices. When boxes are used for packing, cost of same will be added.

All orders must be sent direct to Messrs. HEWS & CO. We do not keep Pots for sale at the Nursery.

WATERMELON SEED.

AUGUSTA, or RATTLESNAKE .- This variety has become well known in the Northern markets for its superior excellence, and it is conceded that the finest Melons of this variety are raised in the vicinity of Augusta. The seed which we offer is perfectly pure, and from selected Melons planted at great distance from any other. This strain has been kept pure for upwards of twenty years, and the annual increase in orders from large growers is a guarantee of its quality. One pound, \$2; five pounds, \$8.75; ten pounds and upwards, per pound, \$1.50; packet, 25c. Postage 16c. per pound additional if sent by mail.

RATES OF FREIGHT ON TREES AND PLANTS.

PLEASE NOTICE.—All Freight shipped by Railroad at these rates must be Prepaid and Released. Remittances to cover charges must be made before shipment. These rates refer to trees packed in Boxes; if packet in Boles, from 10 to 30 per cent. additional must be added. As they are also liable to change, we decline all responsibility for any alterations by the various Railroad lines. Rates for points not named in this list given on application.
